Submit #780375: SourceCodester Simple Doctor's Appointment System 1.0 Unrestricted Upload

Title	SourceCodester Simple Doctor's Appointment System 1.0 Unrestricted Upload
Description	A vulnerability, which was classified as critical, was found in sourcecodester Simple Doctor's Appointment System 1.0. This affects some unknown functionality of the file /doctors_appointment/admin/ajax.php?action=save_category . The manipulation of the argument with an unknown input leads to a unrestricted upload vulnerability. The product allows the attacker to upload or transfer files of dangerous types that can be automatically processed within the products environment. This is going to have an impact on confidentiality, integrity, and availability. User can update file through /doctors_appointment/admin/ajax.php?action=save_category. Web application doesn't sanitize or filters the being uploaded, making it vulnerable to arbitrary file upload vulnerability, that can also lead to Remote Code Execution.
