Submit #780402: code-projects Student Membership System 1.0 SQL Injection

Title code-projects Student Membership System 1.0 SQL Injection

Description The user deletion function directly concatenates \$_POST[id] into the SQL delete statement. An attacker could delete any administrator user, potentially resulting in the loss of system administration privileges.

Impact An attacker could delete all administrator accounts, rendering the system unmanageable, or even delete the entire user table, causing the system to crash.
