Submit #780729: vanna-ai vanna 2.0.2 CORS Origin Reflection with Credentials

Title	vanna-ai vanna 2.0.2 CORS Origin Reflection with Credentials
Description	Vanna <= 2.0.2 contains a CORS misconfiguration in its FastAPI and Flask server implementations. The server reflects any Origin request header value into the Access-Control-Allow-Origin response header while simultaneously setting Access-Control-Allow-Credentials: true. This allows an attacker-controlled website to make authenticated cross-origin requests to the Vanna API on behalf of a victim user, potentially leading to unauthorized data access.
