Submit #780766: SourceCodester Simple Customer Relationship Management (CRM) System 1.0 Cross Site Scripting

Title	SourceCodester Simple Customer Relationship Management (CRM) System 1.0 Cross Site Scripting
Description	<p>A Stored Cross Site Scripting (XSS) vulnerability was identified in the Simple Customer Relationship Management System developed by SourceCodester.</p> <p>The vulnerability exists in the Create Ticket functionality where user supplied input is not properly sanitized before being stored and rendered in the application.</p> <p>An attacker can inject malicious JavaScript payloads into the ticket description field. When the ticket is later viewed in the View Ticket section, the injected script executes in the victim's browser.</p> <p>This vulnerability may allow attackers to execute arbitrary JavaScript code, steal session cookies, perform actions on behalf of the victim or conduct phishing attacks.</p>
