Submit #781757: CampusConnect™ UCC CampusConnect(campusconnect.ucc) 14.3.5 Uploadcare Private Key Exposure

Title	CampusConnect™ UCC CampusConnect(campusconnect.ucc) 14.3.5 Uploadcare Private Key Exposure
Description	The Android application campusconnect.ucc version 14.3.5 hardcodes an Uploadcare private key in campusconnect/BuildConfig.java. An unauthenticated attacker who obtains this key can directly invoke the Uploadcare API to upload, list, download, and delete arbitrary files stored in the Uploadcare bucket. This may result in disclosure of sensitive information and permanent data loss. Additionally, an attacker could upload a malicious file to the Uploadcare service. If the affected website server subsequently downloads and processes that file, it could lead to remote code execution.
