Submit #781764: PropertyGuru AgentNet Singapore(com.allproperty.android.agentnet) 23.7.10 Segment Write Key Exposure

Title PropertyGuru AgentNet Singapore(com.allproperty.android.agentnet) 23.7.10 Segment Write Key Exposure

Description In the Android application com.allproperty.android.agentnet version 23.7.10, two hardcoded Segment write keys were discovered in the source file com/allproperty/android/agentnet/BuildConfig.java. An attacker can extract these keys through reverse engineering and use it to send arbitrary tracking events and modify user profiles via Segment's API. This allows injection of fraudulent analytics data, potentially leading to corrupted business intelligence, incorrect user segmentation, and misuse of downstream systems that rely on this data.
