# Submit #782103: Dromara lamp-cloud 5.8.1 Broken object property level authorization

**Title** Dromara lamp-cloud 5.8.1 Broken object property level authorization

**Description** **# Summary**  
 A broken access control vulnerability exists in 'lamp-cloud' at endpoint 'POST /defUser/pageUser' (DefUserController/pageUser).  
 An authenticated low-privilege user can enumerate users outside their own organization/company scope.  
 This appears to be a row-level authorization/data-scope failure (BOLA/IDOR-style read exposure), not merely an endpoint authentication issue.

**Source** <https://github.com/dromara/lamp-cloud/issues/403>

**User** Anonymous User

**Submission** 03/18/2026 05:05 AM (18 days ago)

**Moderation** 04/04/2026 08:27 AM (17 days later)

**Status** Accepted

**VulDB entry** Accepted [Dromara lamp-cloud up to 5.8.1 DefUserController /defUser/pageUser improper authorization]

**Points** 10
