Submit #782993: UTT (AiTai) HiPER 1250GW <= v3.2.7-210907-180535 Buffer Overflow

Title	UTT (AiTai) HiPER 1250GW <= v3.2.7-210907-180535 Buffer Overflow
Description	A serious buffer overflow vulnerability exists in the /goform/formNatStaticMap interface of the UTT HiPER 1250GW router. An attacker can control related parameters through a crafted request and, when the condition Action != add is satisfied, eventually trigger the unsafe string copy operation strcpy(src_2, src), resulting in a buffer overflow and causing a denial of service (DoS).
