Submit #783322: Technostrobe HI-LED-WR120-G2 Obstruction Lighting Controller 5.5.0.1R6.03.30 Broken Access Control

Title Technostrobe HI-LED-WR120-G2 Obstruction Lighting Controller 5.5.0.1R6.03.30 Broken Access Control

Description The embedded web interface fails to enforce proper access control on administrative endpoints. Sensitive resources are directly accessible without authentication.

Affected Endpoints Example:

```
/Technostrobe/
├── surveillance_generale.html -- [0.1] Open to all
├── surveillance_psu.html -- [0.2] Open to all
├── configPassword.html -- [0.3] Change passwords
├── alarmConfig.html -- [0.4] Tamper alarms
└── /LoginCB (POST) -- [0.5] Change ANY password
1
Host: <target>
```

Accessing protected pages does not require a valid session or authentication token. The server responds with full administrative interface content.

Root Cause:

The application does not validate authentication state on protected routes. Authorization checks are either missing or improperly implemented at the server level.

Impact:

An unauthenticated attacker can:

Access administrative interface

View system configuration

Interact with device controls

This vulnerability allows full system interaction without credentials.
