# Submit #792861: Tenda F451\_kfw\_V1.0.0.7\_cn\_svn7958 V1.0.0.7 Buffer Overflow

**Title** Tenda F451\_kfw\_V1.0.0.7\_cn\_svn7958 V1.0.0.7 Buffer Overflow

**Description** We found an overflow vulnerability in httpd :  
 In fromSafeEmailFilter function,it reads in a user-provided parameter page.  
 And the variable v6 is passed to the sprintf function without any length check, which may overflow the stack-based buffer s.  
 As a result, by requesting the page, an attacker can easily execute a denial of service attack or remote code execution.
