Submit #792865: Tenda F451_kfw_V1.0.0.7_cn_svn7958 V1.0.0.7 Buffer Overflow

Title Tenda F451_kfw_V1.0.0.7_cn_svn7958 V1.0.0.7 Buffer Overflow

Description We found an overflow vulnerability in httpd :
 In WrlclientSet function,it reads in a user-provided parameter GO.
 And the variable s_1 will be passed to the sub_3A494 function without any length check, which may overflow the stack-based buffer s_ by sprintf.
 As a result, by requesting the page, an attacker can easily execute a denial of service attack or remote code execution.
