Submit #792880: Tenda F451_kfw_V1.0.0.7_cn_svn7958 V1.0.0.7 Buffer Overflow

Title Tenda F451_kfw_V1.0.0.7_cn_svn7958 V1.0.0.7 Buffer Overflow

Description We found an overflow vulnerability in httpd. In fmiL7ImForm function, it reads in a user-provided parameter page. And the variable v6 is passed to the sprintf function without any length check, which may overflow the stack-based buffers. As a result, by requesting the page, an attacker can easily execute a denial of service attack or remote code execution.
