## Summary

A vulnerability was found in [itsourcecode Construction Management System 1.0](#). It has been declared as **critical**. Affected by this vulnerability is an unknown functionality of the file `/borrowed_equip_report.php` of the component *Parameter Handler*. The manipulation of the argument *Home* results in sql injection. This vulnerability is known as **CVE-2026-5620**. It is possible to launch the attack remotely. Furthermore, an exploit is available.

## Details

A vulnerability classified as critical has been found in [itsourcecode Construction Management System 1.0](#). Affected is some unknown processing of the file `/borrowed_equip_report.php` of the component *Parameter Handler*. The manipulation of the argument *start* with an unknown input leads to a sql injection vulnerability. CWE is classifying the issue as **CWE-89**. The product constructs all or part of an SQL command using externally-influenced input from an upstream component, but it does not neutralize or incorrectly neutralizes special elements that could modify the intended SQL command when it is sent to a downstream component. This is going to have an impact on confidentiality, integrity, and availability.

The advisory is available at [github.com](#). This vulnerability is traded as **CVE-2026-5620**. The exploitability is told to be easy. It is possible to launch the attack remotely. Technical details and a public exploit are known. This vulnerability is assigned to **T1505** by the MITRE ATT&CK project.

The exploit is shared for download at [github.com](#). It is declared as proof-of-concept. By approaching the search of `inurl:borrowed_equip_report.php` it is possible to find vulnerable targets with Google Hacking.

There is no information about possible countermeasures known. It may be suggested to replace the affected object with an alternative product.
