Summary

A vulnerability was found in [projectworlds Car Rental System 1.0](#). It has been rated as **critical**. This issue affects some unknown processing of the file `/message_admin.php` of the component *Parameter Handler*. Performing a manipulation of the argument `Message` results in sql injection. This vulnerability is known as [CVE-2026-5637](#). Remote exploitation of the attack is possible. Furthermore, an exploit is available.

Details

A vulnerability was found in [projectworlds Car Rental System 1.0](#). It has been classified as **critical**. This affects an unknown function of the file `/message_admin.php` of the component *Parameter Handler*. The manipulation of the argument `message` with an unknown input leads to a sql injection vulnerability. CWE is classifying the issue as [CWE-89](#). The product constructs all or part of an SQL command using externally-influenced input from an upstream component, but it does not neutralize or incorrectly neutralizes special elements that could modify the intended SQL command when it is sent to a downstream component. This is going to have an impact on confidentiality, integrity, and availability.

The advisory is shared at [github.com](#). This vulnerability is uniquely identified as [CVE-2026-5637](#). The exploitability is told to be easy. It is possible to initiate the attack remotely. No form of authentication is needed for exploitation. Technical details and a public exploit are known. MITRE ATT&CK project uses the attack technique [T1505](#) for this issue.

The exploit is shared for download at [github.com](#). It is declared as proof-of-concept. By approaching the search of [inurl:message_admin.php](#) it is possible to find vulnerable targets with Google Hacking.

There is no information about possible countermeasures known. It may be suggested to replace the affected object with an alternative product.
