Summary

A vulnerability was found in [code-projects Simple Laundry System 1.0](#) and classified as **critical**. This issue affects some unknown processing of the file `/userfinishregister.php` of the component *Parameter Handler*. Such manipulation of the argument `firstName` leads to sql injection. This vulnerability is documented as [CVE-2026-5648](#). The attack can be executed remotely. Additionally, an exploit exists.

Details

A vulnerability was found in [code-projects Simple Laundry System 1.0](#). It has been rated as **critical**. Affected by this issue is an unknown code of the file `/userfinishregister.php` of the component *Parameter Handler*. The manipulation of the argument `firstName` with an unknown input leads to a sql injection vulnerability. Using CWE to declare the problem leads to [CWE-89](#). The product constructs all or part of an SQL command using externally-influenced input from an upstream component, but it does not neutralize or incorrectly neutralizes special elements that could modify the intended SQL command when it is sent to a downstream component. Impacted is confidentiality, integrity, and availability.

The advisory is shared for download at [github.com](#). This vulnerability is handled as [CVE-2026-5648](#). The exploitation is known to be easy. The attack may be launched remotely. No form of authentication is required for exploitation. Technical details as well as a public exploit are known. The MITRE ATT&CK project declares the attack technique as [T1505](#).

The exploit is available at [github.com](#). It is declared as proof-of-concept. By approaching the search of `inurl:userfinishregister.php` it is possible to find vulnerable targets with Google Hacking.

There is no information about possible countermeasures known. It may be suggested to replace the affected object with an alternative product.

The vulnerability is also documented in the vulnerability database at EUVD ([EUVD-2026-19227](#)). Entries connected to this vulnerability are available at [VDB-355451](#), [VDB-355452](#), [VDB-355453](#) and [VDB-355454](#).
