Summary

A vulnerability marked as **critical** has been reported in [itsourcecode Construction Management System 1.0](#). This impacts an unknown function of the file `/del.php`. This manipulation of the argument `equipname` causes sql injection. This vulnerability appears as [CVE-2026-6007](#). The attack may be initiated remotely. In addition, an exploit is available.

Details

A vulnerability classified as critical was found in [itsourcecode Construction Management System 1.0](#). Affected by this vulnerability is an unknown code of the file `/del.php`. The manipulation of the argument `equipname` with an unknown input leads to a sql injection vulnerability. The CWE definition for the vulnerability is [CWE-89](#). The product constructs all or part of an SQL command using externally-influenced input from an upstream component, but it does not neutralize or incorrectly neutralizes special elements that could modify the intended SQL command when it is sent to a downstream component. As an impact it is known to affect confidentiality, integrity, and availability.

It is possible to read the advisory at [github.com](#). This vulnerability is known as [CVE-2026-6007](#). The exploitation appears to be easy. The attack can be launched remotely. Technical details and also a public exploit are known. The attack technique deployed by this issue is [T1505](#) according to MITRE ATT&CK.

It is possible to download the exploit at [github.com](#). It is declared as proof-of-concept. By approaching the search of `inurl:del.php` it is possible to find vulnerable targets with Google Hacking.

There is no information about possible countermeasures known. It may be suggested to replace the affected object with an alternative product.
