Summary

A vulnerability classified as problematic was found in code-projects Simple Laundry System 1.0. Affected is an unknown function of the file */checkcheckout.php*. Executing a manipulation of the argument *serviceId* can lead to cross site scripting. This vulnerability appears as CVE-2026-6032. The attack may be performed from remote. In addition, an exploit is available.

Details

A vulnerability classified as problematic was found in code-projects Simple Laundry System 1.0. This vulnerability affects an unknown function of the file */checkcheckout.php*. The manipulation of the argument `serviceId` with an unknown input leads to a cross site scripting vulnerability. The CWE definition for the vulnerability is CWE-79. The product does not neutralize or incorrectly neutralizes user-controllable input before it is placed in output that is used as a web page that is served to other users. As an impact it is known to affect integrity.

The advisory is shared for download at github.com. This vulnerability was named CVE-2026-6032. The exploitation appears to be easy. The attack can be initiated remotely. No form of authentication is required for a successful exploitation. Successful exploitation requires user interaction by the victim. Technical details and also a public exploit are known. The MITRE ATT&CK project declares the attack technique as T1059.007.

It is possible to download the exploit at github.com. It is declared as proof-of-concept. By approaching the search of inurl:checkcheckout.php it is possible to find vulnerable targets with Google Hacking.

There is no information about possible countermeasures known. It may be suggested to replace the affected object with an alternative product.
