Summary

A vulnerability was found in code-projects Vehicle Showroom Management System 1.0. It has been rated as problematic. The affected element is an unknown function of the file */BranchManagement/ProfitAndLossReport.php*. The manipulation of the argument *BRANCH_ID* leads to cross site scripting. This vulnerability is referenced as CVE-2026-6034. Remote exploitation of the attack is possible. Furthermore, an exploit is available.

Details

A vulnerability was found in code-projects Vehicle Showroom Management System 1.0. It has been rated as problematic. This issue affects an unknown function of the file */BranchManagement/ProfitAndLossReport.php*. The manipulation of the argument `BRANCH_ID` with an unknown input leads to a cross site scripting vulnerability. Using CWE to declare the problem leads to CWE-79. The product does not neutralize or incorrectly neutralizes user-controllable input before it is placed in output that is used as a web page that is served to other users. Impacted is integrity.

It is possible to read the advisory at github.com. The identification of this vulnerability is CVE-2026-6034. The exploitation is known to be easy. The attack may be initiated remotely. No form of authentication is needed for a successful exploitation. It demands that the victim is doing some kind of user interaction. Technical details as well as a public exploit are known. The attack technique deployed by this issue is T1059.007 according to MITRE ATT&CK.

The exploit is available at github.com. It is declared as proof-of-concept. By approaching the search of inurl:BranchManagement/ProfitAndLossReport.php it is possible to find vulnerable targets with Google Hacking.

There is no information about possible countermeasures known. It may be suggested to replace the affected object with an alternative product.
