# Submit #765330: Tenda FH451 V1.0.0.9 Stack-based Buffer Overflow

|             |  |
|-------------|--|
| Title       | Tenda FH451 V1.0.0.9 Stack-based Buffer Overflow   |
| Description | A vulnerability was found in Tenda FH451 V1.0.0.9. Affected by this vulnerability is the function <code>fromAdvSetWan</code> of the file <code>/goform/AdvSetWan</code> of the component <code>httpd</code> . The manipulation of the argument <code>wanmode</code> and <code>PPPOEPassword</code> with an unknown input leads to a buffer overflow vulnerability. If the value of argument <code>wanmode</code> is 2, the variable <code>v17</code> is passed to the <code>sub_3C434</code> function without any length check, which may overflow the stack-based buffer <code>s</code> . |
