Submit #765331: Tenda FH451 V1.0.0.9 Stack-based Buffer Overflow

Title Tenda FH451 V1.0.0.9 Stack-based Buffer Overflow

Description A vulnerability was found in Tenda FH451 V1.0.0.9. Affected by this vulnerability is the function formQuickIndex of the file /goform/QuickIndex of the component httpd. The manipulation of the argument mit_linktype and PPPOEPassword with an unknown input leads to a buffer overflow vulnerability. If the value of argument mit_linktype is 2, the variable v10 is passed to the sub_3C434 function without any length check, which may overflow the stack-based buffer s.
