# Submit #768976: Tenda i3 V1.0.0.6(2204) Buffer Overflow

<b>Title</b>	Tenda i3 V1.0.0.6(2204) Buffer Overflow
<b>Description</b>	<p>Affected component(s): httpd, formSetCfm, /goform/setcfm, funcpara1</p> <p>Attack vector: Remote exploitation via crafted HTTP POST to /goform/setcfm with an overly long funcpara1.</p> <p>Suggested description: Tenda i3 V1.0.0.6(2204) contains a stack-based buffer overflow in httpd due to insufficient length validation of the funcpara1 parameter in formSetCfm. A remote attacker can send a crafted request to /goform/setcfm to trigger a denial of service or potentially achieve code execution.</p> <p>Discoverer: Svigo, Huazhong University of Science and Technology</p>
