Submit #777381: Tenda AC5 AC5 V1.0 V15.03.06.47 Buffer Overflow

Title	Tenda ACS AC5 V1.0 V15.03.06.47 Buffer Overflow
Description	The Tenda AC5 V1.0 V15.03.06.47 firmware has a stack overflow vulnerability located in the formSetCfm function. This function accepts the funcpara1 parameter from a POST request and passes it to the save_list_data function. Within save_list_data, the array v10 is fixed at 64 bytes. However, since the user has control over the input of funcpara1, the statement sprintf(v10, "%s list%d", a1, v6), leads to a buffer overflow. The user-supplied funcpara1 can exceed the capacity of the v10 array, thus triggering this security vulnerability.
