Submit #777393: Tenda AC5 AC5 V1.0 V15.03.06.47 Buffer Overflow

Title	Tenda AC5 AC5 V1.0 V15.03.06.47 Buffer Overflow
Description	The Tenda AC5 V1.0 V15.03.06.47 has a stack overflow vulnerability in the formWifiWpsOOB function. The nptr variable receives the index parameter from a POST request. The value is directly used in a sprintf function and passes to a local variable on the stack, which can override the return address of the function. The user-provided index can trigger this security vulnerability.
