# Submit #777394: Tenda AC5 AC5 V1.0 V15.03.06.47 Buffer Overflow

<b>Title</b>	Tenda ACS AC5 V1.0 V15.03.06.47 Buffer Overflow
<b>Description</b>	The Tenda AC5 V1.0 V15.03.06.47 firmware has a stack overflow vulnerability located in the fromWizardHandle function. This function accepts the WAN/Tand WANS parameter from a POST request. Within case 2, this function accepts the PPW parameter from a POST request, which is assigned to decodePwd(ppwoepwd, decode_pwd);. However, since the user has control over the input of PPW, the function decodePwd() leads to a buffer overflow. The user-supplied PPW can exceed the capacity of the decode_pwd array, thus triggering this security vulnerability.
