- ✓ **Create a marketplace that can sell anything.**
From physical, hand-made products to digital downloads like photographs, themes, fonts, audio or video and even time-based bookings with our integration with WooCommerce Bookings.
 - ✓ **Continue selling your own products.**
Display vendor products for sale right alongside your own products.
 - ✓ **Set vendor-specific commission rates.**
Incentivize new vendors to join your marketplace or reward loyal or high earnings with vendor-specific commission rates – while still setting a separate base commission rate across your marketplace.
 - ✓ **Reduce your admin.**
Allow vendors to manage their own products.
 - ✓ **Don't pay commissions on orders that are not completed.**
Set commissions only to be assigned to vendors once the order is completed.
 - ✓ **Stay on top of your marketplace with sales reports.**
Get an overall view of vendor sales, commissions, and monthly earnings by vendor.
 - ✓ **Delay commission payments to account for returns.**
Use PayPal Payouts to delay commission payments in case of returns on physical products.
-

Turn your store into a multi-vendor marketplace

Do you have an existing site and loyal community and would like to find ways to **diversify your revenue**? Or would you like to start an eCommerce business without investing in creating your product line? With **Product Vendors for WooCommerce** you can **instantly** turn a Woo store into a marketplace with multiple vendors, products and payout settings.

Allow multiple vendors to sell via your site and, in return, take a commission on sales to cover the costs of managing the site while you focus your efforts on building a community.

Product Vendors caters for both vendors and marketplace owners with specific features that ensure:

Vendors can:

- control their public profile
- manage their products and edit per-product shipping rules themselves
- add private notes to orders or notes to customers (e.g. tracking numbers)
- view their orders and reports on sales performance
- sell physical and/or digital products as well as time-based bookings
- receive commission payouts

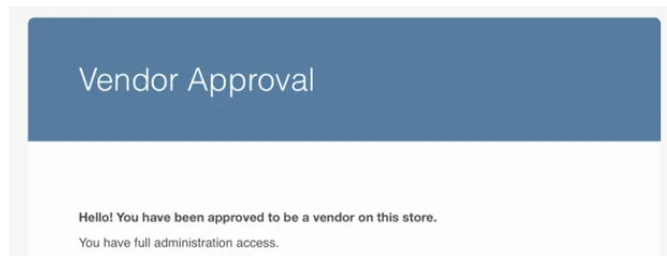

Marketplace owners can:

- accept and approve applications from potential vendors
 - set up one or more vendor admins to manage vendor's information
 - set up each vendor's commission and payout schedule
 - integrate with [WooCommerce Bookings](#) to allow vendors to sell time-based bookings
 - display a vendor rating composed of the ratings of all of the products they sell
 - set products to need approval before being added to the store on a per-vendor basis
 - enable commissions on sales to be a set amount or a percentage and set this individually, per-vendor, per-product, or per-store
 - make payments to vendors instantly, manually, weekly, bi-weekly or monthly
-

Vendor registration form

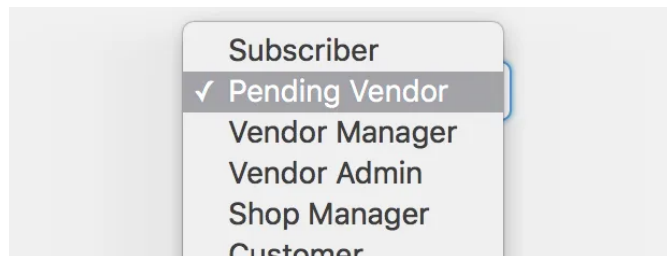

Vendors can register and/or apply by filling out a registration form expressing their interest in selling on your store and they can be accepted and approved on a per application basis.

Send approval emails to vendors

You can now notify potential vendors when their application has been approved with an email sent directly to their inbox.

Multiple vendor settings

Choose from multiple Vendor role settings including Vendor Admin (has access to all vendor settings) and Vendor Manager (limited access, can't see sales tax or other settings).

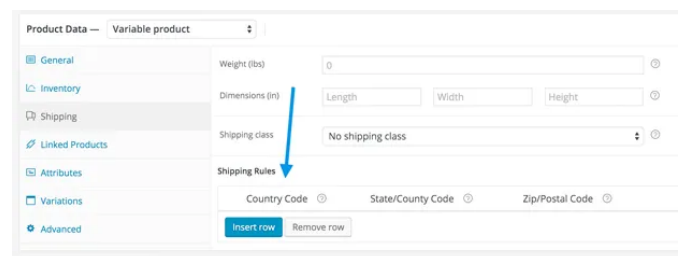

Feature rich vendor management

Intuitive Commission List Management

Order	Order Date	Vendor	Product	Commission
1829	February 2, 2016 9:00 pm	New Balance	1x Multi Var (Color Red) (Size Small)	\$80.00
1825	February 2, 2016 8:57 pm	New Balance	1x Multi Var	\$80.00
1821	February 2, 2016 8:56 pm	New Balance	1x Multi Var	\$20.00
1817	February 2, 2016 8:55 pm	New Balance	1x Multi Var	\$50.00
1813	February 2, 2016 8:54 pm	New Balance	1x Multi Var	\$17.50
1809	February 2, 2016 8:53 pm	New Balance	1x Multi Var	\$3.50

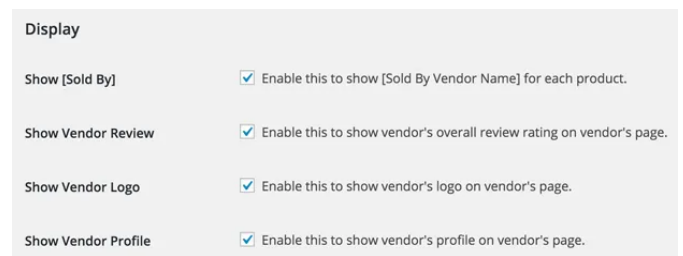

Commissions on sales can be a set amount (ex. \$5 on every purchase) or a percentage (ex. 25% of each sale) — you can set this individually per-vendor, per-product, or per-store.

Manage orders, shipments, and customer notes

Product vendors have built in Per Product Shipping and the ability to add private notes or notes to customers (e.g. tracking numbers).

Selectively show vendor information

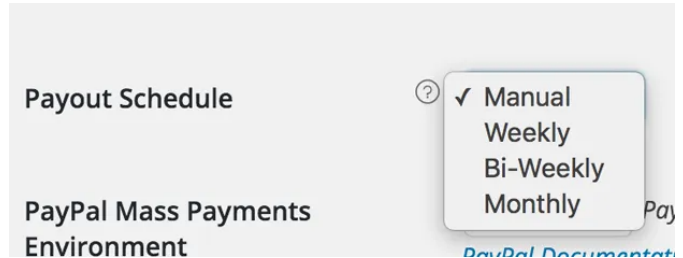

Turn your store into a real marketplace by selectively showing each vendor's, name per product, overall rating, profile photo and profile information.

Manage payout settings

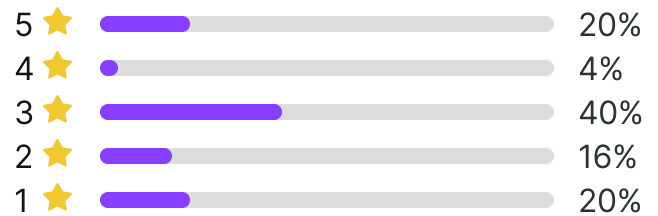

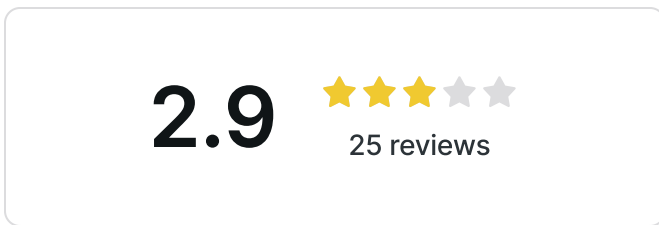

Set up one or more WooCommerce users to manage the vendor's information including profile, email address and logo.

Payments to vendors can be made, instantly (this is a per-vendor setting only and uses PayPal Payouts*), manually, weekly, bi-weekly and monthly.

* subject to approval by PayPal

Support

As others have said, this plugin does not work and is no longer supported. Unless you call an AI bot that just repeats what you have asked support. Yes Woocommerce is free. But if a developer is selling premium extensions they need to make sure they actually work. No wonder people are moving to Shopify.

Appnet Mar 7, 2025

Functionality

It's okay. Really needs a frontend interface and a Stripe Connect integration. Also, the plugin info says it's compatible with HPOS. It is not. That is a lie. When HPOS is enabled I see this error in the vendor report section. "Product Vendors reports are incompatible with the WooCommerce data storage features enabled on your store. Please contact the store manager if you wish to use Product Vendors reports."

Functionality

DANGER beware, SERIOUS performance hit, bad coding practices. This plugin adds ~5 seconds to EVERY request of the admin backend, even those that are completely unrelated. This is the call stack of the expensive query: count_users WC_Product_Vendors_Store_Admin->pending_items_count apply_filters('add_menu_classes') add_menu_classes require_once('wp-admin/includes/menu.php') require('wp-admin/menu.php') So * They are not considerate about when to run their code, which is a huge problem on large wordpress installs * They don't know or care about DB performance * They don't know or care about caching So all in all, this plugin is not a good citizen in your wordpress...

Support

i sent a support ticket two months ago, and until this day , i only got a reply from a bot. how can i directly contact the developer of the plugin?
