

 This is a screenshot of the plugin's settings interface. The left sidebar contains a menu with options like "Pages", "Flamingo", "Contact", "Contact Forms", "Appearance", "Plugins", "Users", "Tools", "Settings", "Duplicator", and "Collapse menu". The main content area is titled "Conditional fields" and contains a table of rules. Each rule has a "Show" dropdown, a condition type (e.g., "if"), a field name, a comparison operator (e.g., "equals"), a value, and "And" and "remove" buttons. A green button at the bottom says "click to add new conditional rule".
 

Show	Field	Operator	Value	And	remove
technical-support	if support-type	equals	Technical support	And	remove
sales-support-sel	if support-type	equals	Sales	And	remove
os-selected	if operating-system	not equals	-- Choose your operating system --	And	remove
	and if operating-system	not equals	Other		remove
os-android	if operating-system	equals	Android	And	remove
os-ios	if operating-system	equals	iOS	And	remove
os-linux	if operating-system	equals	Linux	And	remove
os-windows	if operating-system	equals	Windows	And	remove
os-other-selected	if operating-system	equals	Other	And	remove

# Conditional Fields for Contact Form 7

## Changelog

### 2.7.3 (2026-05-03)

- Security: Fix unauthenticated DoS via repeater `*_count` POST parameter. Thanks to Rahul Karne for the responsible disclosure via VulnCheck.

## 2.7.2 (2026-05-01)

- PRO: Repeater – new `remove_button:per_entry` option to add a remove button to each entry. (Can also be set globally as the default in settings.)

## 2.7.1 (2026-04-21)

- PRO: Fix bugs with tg-pane for calculated fields.

## 2.7 (2026-04-20)

- PRO: Add calculated fields feature.

## 2.6.8 (2026-02-08)

- Fully tested with Contact Form 7 version 6.1.5

## 2.6.7 (2025-11-30)

- Fully tested with Contact Form 7 version 6.1.4
- Fully tested up to WP 6.9

## 2.6.6 (2025-11-01)

- Fix some deprecated notices with PHP 8.4 (Thanks to Mike for reporting the issue with `str_getcsv`)

## 2.6.5 (2025-10-29)

- Fully tested with Contact Form 7 version 6.1.3
- Reduce jQuery dependency

## 2.6.4 (2025-09-30)

- Fully tested with Contact Form 7 version 6.1.2

## 2.6.3 (2025-08-05)

- Fully tested with Contact Form 7 version 6.1.1

## 2.6.2 (2025-07-14)

- Fix togglebutton problem in 2.6.1

## 2.6.1 (2025-07-13)

- Fix problem with some versions of jQuery.

## 2.6 (2025-06-26)

- Fully tested with Contact Form 7 version 6.1
- Add support for [SWV](#)
- always wait until groups are updated before submitting the form
- Disable submit buttons while the form is submitting

## 2.5.14 (2025-06-14)

- Bug fix: Allow multiple class names for group tags [#129](#)

## 2.5.13 (2025-06-13)

- Improve backend mailbox validation.

## 2.5.12 (2025-06-07)

- Bug fix: Make sure legacy forms (created before version 1.4) can be edited.
- Bug fix: Validation Issue with CF7 file upload within multistep form [#128](#) – Thanks to Sebastian Blasius from [huishu-agentur.de](https://huishu-agentur.de) for the fix!

## 2.5.11 (2025-04-10)

- Fully tested with Contact Form 7 version 6.0.6
- Tested up to WP 6.8

## 2.5.10 (2025-03-11)

- Fully tested with Contact Form 7 version 6.0.5

## 2.5.9 (2025-02-18)

- Fully tested with Contact Form 7 version 6.0.4

## 2.5.8 (2025-02-11)

- Enable regular expressions again in the free version.
- Temporarily add contact-form-7-conditional-fields.php file again and point it to the new file. This is to prevent users from getting a fatal error when updating from version 2.5.4. This file will be removed again in a future update.

## 2.5.7 (2025-01-14)

- Fully tested with Contact Form 7 version 6.0.3

## 2.5.6 (2024-12-23)

- Fully tested with Contact Form 7 version 6.0.2

## 2.5.5 (2024-12-20)

- FREE: Rename plugin folder and main file from contact-form-7-conditional-fields/contact-form-7-conditional-fields to conditional-fields
- PRO: Rename plugin folder and main file from contact-form-7-conditional-fields-pro to conditional-fields-pro/conditional-fields.php

## 2.5.4 (2024-12-05)

- Remove some code in the free plugin that was only needed for the PRO version.

## 2.5.3 (2024-12-04)

- Fix form-tag generator button. Now you can insert [group] tags again with the new CF7 form-tag generator. Renamed the button to “Conditional group”.

## 2.5.2 (2024-11-27)

- Fully tested with Contact Form 7 version 6.0.1
- Tested up to WP 6.7

## 2.5.1 (2024-11-03)

- Temporarily remove Conditional Fields buttons to prevent conflicts with CF7 6.0. This means you need to enter the [group] tags manually and can't insert them with the form-tag generator buttons anymore. We are looking into a fix.
- Fully tested with Contact Form 7 version 6.0

## 2.5 (2024-10-22)

- Add Plugin Dependency for CF7 in plugin header
- fix deprecated warning dynamic property creation
- fix Using `#{var}` in strings is deprecated
- Fix XSS vulnerability in admin settings page. Thanks to [Patchstack](#) for reporting this issue.
- PRO: Fix: [response] tag doesn't work properly in multistep [#127](#)
- PRO: Add support for checkbox free\_text option in summary field [#126](#)
- PRO: Fix: [multifile] allows uploading of filetype that is not specified in allowed filetypes [#103](#)

## 2.4.15 (2024-07-27)

- Fully tested with Contact Form 7 version 5.9.8

## 2.4.14 (2024-07-18)

- Fix medium security problem (CVSS 4.3). Thanks to Wordfence for reporting this issue.
- Fully tested with Contact Form 7 version 5.9.7
- Tested up to WP 6.6

## 2.4.13 (2024-06-29)

- Fully tested with Contact Form 7 version 5.9.6

## **2.4.12 (2024-05-25)**

- Fully tested with Contact Form 7 version 5.9.5

## **2.4.11 (2024-05-12)**

- PRO: multistep – Disable next button and prevent submitting while step is being validated.
- Fully tested with Contact Form 7 version 5.9.4

## **2.4.10 (2024-03-30)**

- Fix crappy release

## **2.4.9 (2024-03-30)**

- Fully tested with Contact Form 7 version 5.9.3

## **2.4.8 (2024-03-14)**

- Fully tested with Contact Form 7 version 5.9.2

## **2.4.7 (2024-02-13)**

- Fully tested with Contact Form 7 version 5.8.7

## **2.4.6 (2024-01-15)**

- Fully tested with Contact Form 7 version 5.8.6

## **2.4.5 (2023-12-19)**

- Fix bug with Multistep validation. Caused by cf7cf script not depending on cf7 script.
- Fully tested with Contact Form 7 version 5.8.5

## **2.4.4 (2023-12-10)**

- Fully tested with Contact Form 7 version 5.8.4

### 2.4.3 (2023-11-23)

- Tested up to WP 6.4

### 2.4.2 (2023-11-22)

- Prevent “CF7 needs to be installed” notice from being dismissable. (This notice is only shown to users with the update\_plugins capability)
- Add nonce for dismissing other notices, so bad people who are stealing your session can’t dismiss your precious CF7CF related notices on your behalf anymore. Hopefully now the people of Patchstack will be happy and stop marking this plugin as vulnerable.
- Tested up to WP 6.3
- Remove some unused constants

### 2.4.1 (2023-11-16)

- Patch minor access-control vulnerability reported by [patchstack](#)
- Fully tested with Contact Form 7 version 5.8.3

### 2.4 (2023-11-13)

- Removed webpack build. (This might cause JS errors in outdated browsers.)
- Fix admin validator Error. Thanks to [joostdekeijzer](#)
- Fix some jQuery code. Thanks to [hirasso](#)

### 2.3.12 (2023-10-27)

- Fully tested with Contact Form 7 version 5.8.2

### 2.3.11 (2023-10-03)

- Fully tested with Contact Form 7 version 5.8.1

### 2.3.10 (2023-08-07)

- Fully tested with Contact Form 7 version 5.8

### **2.3.9 (2023-05-31)**

- Fully tested with Contact Form 7 version 5.7.7

### **2.3.8 (2023-04-23)**

- Fully tested with Contact Form 7 version 5.7.6

### **2.3.7 (2023-04-13)**

- PRO: Fix obscure bug with `disable_on_hide`. Disabled fields didn't get recognized after calling `reset()` on the form element or after adding a repeater, causing conditions relying on disabled fields to malfunction.

### **2.3.6 (2023-04-11)**

- Fully tested with WP version 6.2

### **2.3.5 (2023-03-24)**

- Fully tested with Contact Form 7 version 5.7.5.1
- Note: Previously it was possible to add a contact-form shortcode with only the title and not the ID. But since the last update of CF7 this seems to throw an error. Use the official shortcode provided by CF7 to prevent this.

### **2.3.4 (2023-02-19)**

- Fully tested with Contact Form 7 version 5.7.4

### **2.3.3 (2023-01-26)**

- PRO: Fix [summary]. CF7 5.7.3 introduced a tag-check function which [summary] did not pass.
- Fully tested with Contact Form 7 version 5.7.3

### **2.3.2 (2022-12-28)**

- Fully tested with Contact Form 7 version 5.7.2

## 2.3.1 (2022-12-17)

- PRO: fix problem with line breaks in multistep forms.

## 2.3 (2022-12-16)

- Fully tested with Contact Form 7 version 5.7.1
- PRO: Changed containing element for repeater and step controls from DIV to P. Otherwise CF7 would create additional P elements.

## 2.2.11 (2022-12-13)

- DO NOT UPDATE TO CONTACT FORM VERSION 5.7!! At least wait for version 5.7.1 before updating
- Reverted autop-fix because it was causing additional errors.
- Reverted compatibility declaration to CF7 version 5.6.4

## 2.2.10 (2022-12-11)

- Fully tested with Contact Form 7 version 5.7 (when WP\_DEBUG is false). Note: due to some errors in Contact Form 7 version 5.7 you will need to make sure WP\_DEBUG is set to false in your wp-config.php file.
- disable automatic insertion of paragraphs. Recent CF7 updates have changed the autop mechanism, causing too many problems with parsing the HTML code. If you still want to use autop (at your own risk) copy this code to your functions.php file: `add_filter( 'wpcf7_autop_or_not', '__return_true', 41, 0);`. Until further notice Conditional Fields and Conditional Fields for Contact Form 7 will not use the automatic paragraph feature of CF7. Always try to write clean and valid HTML code. [GH issue 85](#)

## 2.2.9 (2022-10-19)

- Fully tested with Contact Form 7 version 5.6.4
- Add action hook: [wpcf7cf\\_step\\_completed](#)

## 2.2.8 (2022-10-14)

- Fix acceptance field bug

## 2.2.7 (2022-10-14)

- Remove unwanted whitespace between closing and opening group tags in mail messages.
- Fix problems with acceptance fields [More info](#)
- Redesign of [form tester](#)

## 2.2.6 (2022-09-08)

- PRO: Fix issues with validation in nested repeaters [GH issue 92](#)
- Fix error with optional file field in hidden group [GH issue 92](#)

## 2.2.5 (2022-09-04)

- PRO: Fix bug with togglebutton

## 2.2.4 (2022-09-01)

- Fully tested with Contact Form 7 version 5.6.3
- JS code refactoring
- Allow adding class names to group. For example: `[group g class:my-class][[/group]`

## 2.2.3 (2022-08-10)

- Fully tested with Contact Form 7 version 5.6.2
- [Fix](#) for smartgrid plugin
- Some code refactoring

## 2.2.2 (2022-08-07)

- Performance improvements

## 2.2.1 (2022-07-21)

- Fully tested with Contact Form 7 version 5.6.1

## 2.2 (2022-06-17)

- Make compatible with Contact Form 7 version 5.6

## 2.1.6 (2022-06-07)

- Fix bug: text view cleared after making a change to form code when there are more than 50 conditions.

## 2.1.5 (2022-05-22)

- Fully tested with Contact Form 7 version 5.5.6.1

## 2.1.4 (2022-05-16)

- It's no longer needed to save the form before adding conditions. Available groups are updated instantaneously after adding/changing them in the form editor.
- Fix problems when group is named "children" [GH issue 74](#)
- Fix problems with unsaved changes notice [GH issue 91](#)
- Tested up to WP 6.0

## 2.1.3 (2022-04-18)

- check for user\_cap 'wpcf7\_edit\_contact\_forms' instead of 'wpcf7\_edit\_contact\_form' in several places. Thanks, [@paybox!](#)
- PRO multistep: make "Next step" and "Previous step" buttons translatable by third party plugins like wpml and loco translate.
- PRO multistep: show spinner while validating a step.
- PRO Fix additional disable\_on\_hide bug with multistep [GH issue 87-4](#)
- Replace all occurrences of text domain 'contact-form-7' with 'cf7-conditional-fields'

## 2.1.2 (2022-02-23)

- Fully tested with Contact Form 7 version 5.5.6

## 2.1.1 (2022-02-14)

- Fully tested with Contact Form 7 version 5.5.5
- Make scroll to success message less annoying. [GH Issue 90](#)

- Add extra check to make sure that scroll to success message only happens when the e-mail is sent. [GH Issue 90](#)
- PRO: fix disable\_on\_hide bugs. [GH issue 87](#)

## 2.1 (2022-01-27)

- Tested up to wp 5.9
- Scroll success message into view after successful form submission. [GH Issue 90](#)
- Small changes [GH PR 86](#)
- Make 'change' event bubble up [GH PR 88](#)

## 2.0.9 (2022-01-20)

- Fully tested with Contact Form 7 version 5.5.4

## 2.0.8 (2021-11-28)

- Check how code changes in CF7 related to `wpcf7_contact_form_properties` impact the plugin, and update TODO comments accordingly.
- Fully tested with Contact Form 7 version 5.5.3
- Write additional tests for forms loaded via AJAX
- only show compatibility notices to users with the `update_plugins` capabilities

## 2.0.7 (2021-10-26)

- Fully tested with Contact Form 7 version 5.5.2 (and also make the warning message disappear if all plugins are up to date)

## 2.0.6 (2021-10-26)

- Fully tested with Contact Form 7 version 5.5.2

## 2.0.5 (2021-10-13)

- Fully tested with Contact Form 7 version 5.5.1

## 2.0.4 (2021-07-19)

- Fix issue with required file fields
- Fully tested with Contact Form 7 version 5.4.2

### 2.0.3 (2021-05-02)

- Fully tested with Contact Form 7 version 5.4.1
- (dev note: fixed automated tests)

### 2.0.2 (2021-04-06)

- Fix bug: third-party required fields not triggering validation. Thanks [@dedotombo!](#)

### 2.0.1 (2021-03-31)

- Force height:auto on groups. (Fixes regression errors with groups inside repeaters)
- Allow more funky characters as conditional fields values (there was a problem with less than sign <)
- Fix bug with hidden required file and multifile fields causing validation errors
- Implemented extra tests so these errors cannot reoccur in future updates.

### 2.0 (2021-03-29)

- WARNING! 2.0 requires at least Contact Form 7 version 5.4 to work!
- Make plugin compatible with CF7 5.4
- Modify wpcf7cf\_generate\_summary function, so it can be used without \$\_POST
- fix animaton when showing group

## Versions 0.1 – 1.9.16 (2020-06-04 – 2021-03-09)

- [Full changelog](#)

Version	2.7.3
Last updated	3 days ago
Active installations	100,000+
WordPress version	5.0 or higher

Tested up to 6.9.4

PHP version 7.0 or higher
