## Changelog

Project maintained on GitHub at [iworks/iworks-pwa](#).

### 1.7.8 (2025-09-01)

- **Dependencies:** Updated the [iWorks Options](#) module to version 3.0.8.
- **Bug Fix:** Fixed an issue with empty WP\_Screen object. Props for [symington](#).

## 1.7.7 (2025-07-23)

- **Bug Fix:** Fixed an issue with the `INPUT_GET` which was use as variable not constant. [#18](#). Props for [Zach Adams](#).
- **New:** Added experimental feature: “Display Override”.

## 1.7.6 (2025-07-22)

- **Code Quality:** Removed debug function. [#19](#). Props for [Zach Adams](#).
- **Dependencies:** Updated the [iWorks Options](#) module to version 3.0.7.

## 1.7.5 (2025-05-29)

- **New:** Added experimental features section with description field, and screenshot uploads.
- **Security:** Improved input validation and sanitization throughout the plugin.
- **i18n:** Fixed textdomain for consistent translation handling.
- **Dependencies:** Updated the [iWorks Options](#) module to version 3.0.6 and the [iWorks Rate](#) module to version 2.3.1.

## 1.7.4 (2025-05-18)

- **Performance:** Made `get_cache_name()` method protected in `iWorks_PWA` class for better extensibility.
- **Cache:** Updated cache key generation to use plugin version for better cache management.
- **Documentation:** Added comprehensive PHPDoc for the new `set_transient` method.
- **Code Quality:** Improved code organization and inline documentation.

## 1.7.3 (2025-05-15)

- Updated the [iWorks Options](#) module to version 3.0.1.
- Added description for options: “Cache Version” and “Cache Time”

## 1.7.2 (2025-05-14)

- Added `iworks_pwa_cache_name` filter to allow modification of cache keys.

- Centralized transient handling with new `set_transient` method.
- Updated all direct `set_transient` calls to use the new method.
- Improved cache key generation to use plugin version.
- Added comprehensive PHPDoc for the new `set_transient` method.

## 1.7.1 (2025-05-05)

- Added a nonce check to the menu-saving action for improved security.
- Added escaping functions in multiple areas to enhance security.
- Replaced the `unlink()` function with `wp_delete_file()` for better compatibility and safety.
- Updated the [iWorks Options](#) module to version 3.0.0.

## 1.7.0 (2025-03-13)

- Updated the [iWorks Options](#) module to version 2.9.8.

## 1.6.9 (2025-03-09)

- A extra check for the `get_current_screen()` function has been added. [#12](#). Props for [inmyopinion202](#).
- Data sanitization has been added in several places.
- Updated the [iWorks Options](#) module to version 2.9.7.
- Updated the [iWorks Rate](#) module to version 2.2.3.
- The `load_plugin_textdomain()` function has been removed.
- Warnings during AJAX calls has been fixed.
- Updating plugin from GitHub releases has been improved.

## 1.6.8 (2024-12-31)

- An error occurred during activation has been fixed. [#11](#). Props for [carameldavid](#).

## 1.6.7 (2024-12-09)

- Loading integrations action has been fixed.

## 1.6.6 (2024-12-06)

- Few “translators” comments where been added. [#9](#)

- Updated the [iWorks Rate](#) module to version 2.2.1.
- Translation loading time has been fixed. [#10](#)
- The “orientation” field has been updated. [#8](#)

## 1.6.5 (2024-11-12)

- Detailed explanation for missing `manifest.json` and `ieconfig.xml` requests where been added. [#2](#)
- Wrong `purpose` value has been fixed. Props for [vitalii-work](#). [#6](#)

## 1.6.4 (2024-10-01)

- Ability to upload SVG file has been removed due to Stored Cross-Site Scripting vulnerability. We recommended to install [Safe SVG](#) to allow upload SVG files. Props for discovering and reporting for [Francesco Carlucci](#).

## 1.6.3 (2024-09-16)

- All empty values where been removed from `manifest.json`.
- The categories element has been added into `manifest.json`.
- The deprecated key `apple-mobile-web-app-capable` has been changed into `mobile-web-app-capable`.

## 1.6.2 (2024-08-26)

- The scope value is now relative to or limited to the site URL. Props for [leighcc](#). Check configuration screen for new option.
- The plugin version has been added to cache key, to force refresh data after plugin update.

## 1.6.1 (2024-08-20)

- The meta viewport check request has been limited to one per day. Props for [skyfly024](#).
- Updated the [iWorks Rate](#) module to version 2.2.0.

## 1.6.0 (2024-07-04)

- The filter `iworks-pwa/manifest/data` has been added. It's allowed to modify entire content of the `manifest.json` file. Props for [jdwf0658](#).
- The `.editorconfig` file has been added.

- Updated the [iWorks Rate](#) module to version 2.1.9.

## 1.5.9 (2024-02-24)

- A few sizes have been added. [#3](#). Props for [wfrank94](#).
- The plugin URL has been changed to [github](#).
- Updated the [iWorks Options](#) module to version 2.9.2.
- Updated the [iWorks Rate](#) module to version 2.1.8.

## 1.5.8 (2023-12-27)

- The check for a tag meta with the “viewport” value has been added after changes in plugins activations.
- The dynamic property has been fixed.
- The function `parse_url()` has been replaced by the function `wp_parse_url()`.
- Updated the [iWorks Options](#) module to version 2.9.0.
- Updated the [iWorks Rate](#) module to version 2.1.6.
- The nonce check has been added to check “viewport” feature.

## 1.5.7 (2023-11-17)

- [Empty shortcuts in the manifest.json file have been fixed](#). Props for [elmando111](#).
- The filter `iworks-pwa/manifest/shortcuts` has been added. It's allowed to modify the shortcuts array in the `manifest.json` file.
- The filter `iworks-pwa/manifest/shortcuts/element/url/campaign` has been added. It's allowed to modify the campaign in shortcuts urls.
- Updated the [iWorks Options](#) module to version 2.8.8.

## 1.5.6 (2023-10-27)

- Wrong function name `get_color_background()` has been fixed. Props for [bodhisattvac](#).
- Updated the [iWorks Options](#) module to version 2.8.7.
- Updated the [iWorks Rate](#) module to version 2.1.3.
