## Changelog

### 4.12.2 – Apr 20, 2026

- Add Mailchimp Campaign Archive block and `[mc4wp_campaigns]` shortcode to show an archive Mailchimp email campaigns. Thanks to [Faisal Ahammad!](#)
- WooCommerce: Allow “after email” position for sign-up checkbox when using Checkout Block.
- WooCommerce: Detect use of Checkout Block and only show available positions.
- Show warning when cron is behind schedule. Thanks to [Faisal Ahammad!](#)
- Add preliminary support for [Mailchimp Site Tracking Pixel](#). Thanks to [Faisal Ahammad!](#)

## 4.12.1 – Mar 26, 2026

- Supply a custom capability type to `register_post_type` for the `mc4wp-form` post type.
- Limit allowed HTML in the various form messages to a safe subset on load (versus only on update).

## 4.12.0 – Mar 9, 2026

- Remove the ability to unsubscribe through a form. You should migrate to the Mailchimp hosted form for this, which does email verification.
- Add block properties so the form block can be reordered inside the Gutenberg editor.
- Fix redirect not occurring after running MC4WP actions.
- Various type fixes, PHPDoc improvements and removal of unused code.

The following fixes and improvements were contributed by [Faisal Ahammad](#):

- Add WP Forms field setting for configuring double opt-in.
- Add PeepSo registration form integration.
- Fix required validation for Ninja Forms integration.
- Add autocomplete attribute to form fields.
- Enable live updates in Gravity Forms editor.

## 4.11.0 – Jan 20, 2026

- Add form setting to remove tags from existing subscribers.
- Add form setting to check for common email typos.
- In Prosopo integration, link directly to API key screen instead of user profile.
- Automatically convert string fields to a comma-separated string if an array value is received.
- Fix undefined key warning for new setting that emails to site administrator on errors.

## 4.10.9 – Nov 28, 2025

- Specify `apiVersion` in call to `registerBlockType` so that WordPress 6.9 knows it can use the new iframe based editor.
- Add new setting to send an email for critical errors, like API errors returned by Mailchimp.

## 4.10.8 – Oct 21, 2025

- Show warning to administrators if a form is showing but Mailchimp API key is not set.
- Update third-party JS dependencies.

## 4.10.7 – Sep 05, 2025

- Handle renewing lists through server-side redirect instead of JS component.

## 4.10.6 – Jul 23, 2025

- [WooCommerce Checkout] Fix checkbox from showing up in order confirmation email if using Checkout Block.
- [Forms] Fix `{response}` tag being escaped.

## 4.10.5 – Jun 25, 2025

- [Ninja Forms] Always show at least one list option so that onchange event fires properly (to load Audience fields).
- Update third-party JS dependencies.
- Optimize SVG icons for reduced file sizes.

## 4.10.4 – May 26, 2025

- Improved context-dependent escaping in dynamic content tags.

## 4.10.3 – Apr 16, 2025

- Update third-party JS dependencies.
- Add message setting for when a form submission is marked as spam.
- Log exact anti-spam rule when a form submission is marked as spam.
- Handle potential Prosopo connection errors gracefully.

## 4.10.2 – Feb 28, 2025

- Fix WPForms parameter type change causing a fatal error if using WPForms with a Mailchimp sign-up field.
- Add Mailchimp data to Personal Data exporter. Contributed by [David Anderson from UpdraftPlus](#).
- Prevent PHP notices in lists overview on general settings page.

## 4.10.1 – Feb 06, 2025

- Fix JS error breaking Ninja Forms edit form page when not connected to a Mailchimp account or account has no audiences.
- Remove `sprintf` usage in hot path.
- Lazy load `MC4WP_API_V3` class to save some memory and parse time.
- Save a tiny bit of memory in autoloader implementation by not repeatedly storing plugin directory.
- Remove unused setting key from default options.

## 4.10.0 – Jan 23, 2025

- Bump required PHP version to 7.4 or higher.
- Obfuscate API key the same way as in the Mailchimp.com interface.
- Delete all plugin data when plugin is uninstalled / deleted via WP Admin.
- Fix several PHP 8.4 deprecation warnings.
- Address warning about translations being loaded too early if using Ninja Forms integration.
- Run stored setting values related to user-facing textual messages through `i18n` functions to allow translating them through plugins like Loco Translate or WPML.

## 4.9.21 – Jan 08, 2025

- [Forms] Rename “list choice” to “audience choice” in available form fields.
- [Ninja Forms] Fix `gettext` being called too early warning in Ninja Forms base class.
- [WooCommerce] Allow pre-checking of sign-up checkbox in Checkout Block.

## 4.9.20 – Dec 18, 2024

- Fix Ninja Forms integration field no longer showing up.
- Fix “link is expired” message because of missing nonce on button to dismiss API key notice.
- [WPML] Added `text_no_lists_selected` to the config file so it can be translated. Thanks [Diego Pereira!](#)

## 4.9.19 – Nov 11, 2024

- Add integration with [Prosopo](#), a GDPR compliant anti-spam solution for protecting your sign-up forms against bot sign-ups. Thanks [Maxim Akimov](#)!

## 4.9.18 – Oct 21, 2024

- Bump required PHP version to 7.2.
- Prevent non-functional checkbox from showing up on WooCommerce my account page if WooCommerce checkout integration is enabled.
- Update default form content to include a “for” attribute on the label element.
- Minor performance optimizations to `MC4WP_Form::get_subscriber_tags()`
- Begrudgingly rename Mailchimp lists to Mailchimp audiences throughout the plugin's admin interfaces.

## 4.9.17 – Sep 17, 2024

- Fix compatibility with WooCommerce versions 8.5 to 8.8 because of private method that was later made public.
- Fix potential reflected XSS by stripping and escaping all HTML from `{email}` tag replacements. Thanks to kauenavarro for responsibly disclosing.
- Fix potential stored XSS for attackers with both administrator access and Mailchimp account access by escaping HTML from interest group name. Thanks to Jorge Diaz (ddiax) for responsibly disclosing.

## 4.9.16 – Sep 11, 2024

- Add support for WooCommerce Checkout Block in sign-up checkbox integration.

## 4.9.15 – Aug 13, 2024

- Improved anti-spam measures on the [custom form integration](#). If you are using the custom form integration (using the `mc4wp-subscribe` checkbox), please test your forms after upgrading and report any issues to us.
- Improved anti-spam measures on all sign-up forms.
- Remove unsupported filter hook from Gravity Forms integration.

## 4.9.14 – Jul 17, 2024

- Very minor code-size improvements to public forms related JavaScript.

- Update third-party JS dependencies.
- Bump tested WordPress version to 6.6.

### 4.9.13 – Apr 25, 2024

- Fix issue with Composer classmap throwing a fatal error when an older version of Composer is already loaded.

### 4.9.12 – Apr 22, 2024

- Fix last 10 Mailchimp lists not being pulled-in when having more than 10 lists.

### 4.9.11 – Jan 8, 2024

- Update third-party JS dependencies.
- Bump tested WordPress version.

### 4.9.10 – Nov 20, 2023

- Integrations: Update CheckoutWC hook name for WooCommerce checkbox integration.
- Forms: Don't show form preview to users without `edit_posts` capability.
- Forms: Explicitly exclude form preview from search engine indexing.
- General: Don't unnecessarily go through service container while bootstrapping plugin.
- General: Remove some unnecessary JavaScript now that browser support has caught up.

### 4.9.9 – Oct 3, 2023

- Fix class "MC4WP\_Usage\_Tracking" not found error for WP Cron / WP CLI processes.

### 4.9.8 – Oct 3, 2023

- Remove the opt-in usage tracking functionality as we're not really using it for decision making anymore.
- Add missing label element to the select element for setting the logging level.
- Our JavaScript assets are now transpiled to support the same set of browsers as WordPress core. This drops support for some very old browsers, but results in smaller bundle sizes for the supported set of browsers.
- Update third-party JS dependencies to their latest versions.

## 4.9.7 – Aug 29, 2023

- Update third-party JS dependencies.
- Minor textual improvements.
- Bump tested WordPress version.

## 4.9.6 – Jul 12, 2023

- Update third-party JS dependencies.
- Address some minor codestyle issues.

## 4.9.5 – Jun 7, 2023

- Fix generated HTML for list/audience choice fields.
- Fix deprecation warning in includes/admin/class-review-notice.php.
- Update JavaScript dependencies.

## 4.9.4 – May 2, 2023

- Fallback to default checkbox label if none given. Thanks to [Shojib Khan](#).
- Improve WooCommerce integration settings page by disabling position field if integration is disabled. Thanks to [Shojib Khan](#).
- Update JavaScript dependencies.

## 4.9.3 – Mar 31, 2023

- Defend against breaking change in latest WPForms update.

## 4.9.2 – Mar 21, 2023

- Add support for a field named `MARKETING_PERMISSIONS` to enable GDPR fields configured in Mailchimp. A [sample code snippet can be found here](#).
- Remove Google reCaptcha feature. This was already disabled if you were not already using it.

## 4.9.1 – Feb 7, 2023

- Fix generated value attribute for fields of type choice (dropdown, checkboxes, radio fields).

- Fix type of `marketing_permissions` field in API requests. Thanks to [George Korakas](#).
- Refactor list overview JS to not depend on Mithril.js anymore.
- Simplify admin footer text asking for a plugin review.
- When renewing lists, renew cached marketing permissions too.

## 4.9.0 – Jan 13, 2023

- Removed deprecated filter hook `mc4wp_settings_cap`, use `mc4wp_admin_required_capability` instead.
- Removed deprecated filter hook `mc4wp_merge_vars`, use `mc4wp_form_data` or `mc4wp_integration_data` instead.
- Removed deprecated filter hook `mc4wp_form_merge_vars`, use `mc4wp_form_data` instead.
- Removed deprecated filter hook `mc4wp_integration_merge_vars`, use `mc4wp_integration_data` instead.
- Removed deprecated filter hook `mc4wp_valid_form_request`, use `mc4wp_form_errors` instead.
- Removed deprecated function `mc4wp_get_api()` and deprecated class `MC4WP_API`.
- Removed deprecated function `mc4wp_checkbox()`.
- Removed deprecated function `mc4wp_form()`, use `mc4wp_show_form()` instead.
- Added filter `mc4wp_debug_log_message` to modify or disable messages that are written to the debug log.
- Fix color of invalid Mailchimp API key notice.
- Sanitize IP address value from `$_SERVER['REMOTE_ADDR']` too.
- Fetch GDPR marketing permissions via first subscriber on list and show them in lists overview table.

## 4.8.12 – Dec 06, 2022

- Minor performance, memory usage & size optimizations for all JavaScript code bundled with this plugin.

## 4.8.11 – Nov 1, 2022

- Improved default styling for the WooCommerce sign-up checkbox integration.
- Add `<strong>` to allowed HTML elements for GDPR disclaimer text on settings pages.
- Remove all references to obsolete placeholders.js polyfill.
- Move the GiveWP sign-up checkbox closer to the email input field. Thanks [Matthew Lewis](#).

## 4.8.10 – Sep 14, 2022

- Fix `mc4wp_get_request_ip_address()` to return an IP address that matches Mailchimp's validation format when X-Forwarded-For header contains a port component.

## 4.8.8 – Aug 25, 2022

- Fix `mc4wp_get_request_ip_address()` to pass new Mailchimp validation format. This fixes the “This value is not a valid IP.” error some users using a proxy may have been seeing.

## 4.8.7 – Mar 2, 2022

- Fix PHP 8.1 deprecation warnings in `MC4WP_Container` class.
- Fix name of action hook that fires before Mailchimp settings rows are displayed on the settings page. Thanks [LoonSongSoftware](#).
- Improve WPML compatibility. Thanks [Sumit Singh](#).
- Fix deprecated function for AMP integration.
- Only allow unfiltered HTML if user has `unfiltered_html` capability. Please read the below.

Despite extensive testing, we may have missed some more obscure HTML elements or attributes from our whitelist.

If you notice that some of your form HTML is stripped after saving your form, please get in touch with our support team and provide the HTML you attempted to save.

## 4.8.6 – Jun 24, 2021

- Add nonce field to button for dismissing notice asking for plugin review.
- Add strings from config/ directory to POT file.
- Add nonce check to AJAX endpoint for refreshing cached Mailchimp lists.
- Add capability check to AJAX endpoint for retrieving list details.
- Schedule event to refresh cached Mailchimp list upon plugin activation.

Thanks to the team over at [pluginvulnerabilities.com](https://pluginvulnerabilities.com) for bringing some of these changes to our attention.

## 4.8.5 – Jun 1, 2021

Add nonce verification to all URL's using `_mc4wp_action` query parameter.

This fixes a CSRF vulnerability where a malicious website could trick a logged-in admin user in performing unwanted actions.

A special thanks to Erwan from [WPScan](#) for bringing this issue to our attention.

## 4.8.4 – May 7, 2021

- Add `defer` attribute to JS file, so page parsing isn't blocked at all.
- Rewrite plugin CSS to optimize for selector performance and get rid of some duplication.

After installing this update, make sure to also update any add-on plugins like [Mailchimp for WordPress Premium](#) and [Mailchimp Top Bar](#).

### 4.8.3 – Jan 21, 2021

- Fix fatal error on older PHP versions when submitting form without any subscriber tags set in the form settings.
- Minor performance improvement in bootstrap method of the plugin.

### 4.8.2 – Jan 20, 2021

- Allow short-circuiting `mc4wp_subscriber_data` filter by returning `null` or `false`.
- Use a subdirectory for the default debug log file location, so that it's easier to protect using htaccess.
- Improved reliability for fetching lists from mailchimp when lists have high `stats.member_count` property.

### 4.8.1 – Aug 25, 2020

- Fix notice by explicitly setting `permission_callback` on registered REST route.
- Minor internal code improvements.

### 4.8 – Jul 9, 2020

- Plugin now requires PHP 5.3 or higher.
- Prefix overlay classname to prevent styling collisions with other plugins.
- Form sign-ups can now add tags to both new and existing subscribers.
- Update JavaScript dependencies.
- Register script early to work with Gutenberg preview.

### 4.7.8 – Jun 04, 2020

- Add `MC4WP_API_V3::add_template` method.
- Minor code hardening to ensure a default form is always set.
- Update JS dependencies to their latest versions.
- Fix icon for Gutenberg block.

## 4.7.7 – Apr 28, 2020

- Update JS dependencies to their latest versions.
- API client `add_list_member` method now has an additional parameter to skip merge field validation.
- Simplify code for updating an existing form.

## 4.7.6 – Apr 9, 2020

- Update JS dependencies to their latest versions.
- Check if `className` is of type string, fixes a console warning when clicking inside a SVG element.
- Minor improvements to the AMP implementation to address harmless validation warnings.

## 4.7.5 – Feb 10, 2020

- Add AMP compatibility to sign-up forms, thanks to Claudiu Lodromanean. This uses the [official AMP plugin for WordPress](#).
- Add settings key to WPML config so settings can easily be copied over to translated versions of a form.
- Optimize size & performance of JavaScript code, resulting in a file that is 40% smaller.
- Update CodeMirror to its latest version.
- Escape all string translations.

## 4.7.4 – Dec 7, 2019

### Fixes

- htaccess config for servers running Apache 2.4 or later.

## 4.7.3 – Dec 4, 2019

### Fixes

- Top Bar & User Sync add-on using API v2 since version 4.7.1.
- Revert change in formatter for date fields, breaking all forms with date fields in them.

### Improvements

- Add getter method for raw (unmodified) data on form class.

## 4.7.2 – Nov 27, 2019

## Fixes

- Invalid .htaccess file in case there already is one in the uploads directory.

## 4.7.1 – Nov 26, 2019

### Improvements

- Update MemberPress hook names. Thanks [Ian Heggaton!](#)
- Use WordPress.org translations instead of bundling translation files in plugin itself.
- Write .htaccess to directory of debug log file, to prevent file access.
- Add some convenient hooks for Checkout for WooCommerce.
- Stop parsing shortcodes in text widgets as WordPress core does this since version 4.9.

## 4.7 – Nov 7, 2019

### Improvements

- Add role=alert to form notices.
- Add setting to pre-check sign-up checkbox for Gravity Forms integrations.
- Add new position for WooCommerce integration: directly after the billing\_email field.
- Fix PHP notices for submitting a form and saving a form as an administrator.
- Add link to [Koko Analytics plugin](#).

## 4.6.2 – Oct 24, 2019

### Fixes

- Address fields in forms would always be required (even if really optional).

### Improvements

- Add proper SVG admin menu icon.
- Minor overall performance and memory usage improvements.

## 4.6.1 – Oct 7, 2019

### Fixes

- Fixed list cache usage for WPForms, Gravity Forms and Ninja Forms integrations.

## 4.6.0 – Oct 7, 2019

### Improvements

- Improved fetch and cache mechanism for retrieving Mailchimp account details, fetching data only when it is required.
- Updated [Mithril](#) and [CodeMirror](#) dependencies.
- Decreased size of `forms.js` from 22KB to 9KB.
- No longer requiring jQuery anywhere.
- Increase API HTTP request timeout to 15 seconds.

Please note that installing this update requires you to also update any add-ons like [Mailchimp Top Bar](#) and [Mailchimp for WordPress Premium](#) (if installed).

## 4.5.5 – Sep 12, 2019

### Fixes

- Google reCAPTCHA script was still loading even if no forms have it enabled.

## 4.5.4 – Sep 11, 2019

### Improvements

- Removed custom color from menu item for improved accessibility.
- Take birthday field format into account when sending data to Mailchimp.
- Print Google reCAPTCHA script in footer.

### Changes

- Changed plugin name to MC4WP instead of Mailchimp for WordPress.

## 4.5.3 – July 23, 2019

### Fixes

- Temporarily switch status of pending subscribers to “unsubscribe” versus deleting subscriber before re-subscribing.
- Deprecation notice for Gravity Forms version 2.4 and higher.

### Improvements

- Filter out empty tags when applying tags to new subscribers.
- Show all not installed integrations.
- Show notice when form doesn't have a Mailchimp list selected to subscribe people to.
- Check function existence for compatibility with WordPress 4.7
- Don't submit form when Google reCAPTCHA is enabled but errors.
- Update third-party JavaScript dependencies.

## 4.5.2 – May 8, 2019

### Improvements

- Accept more truthy values in custom integration for improved compatibility with third-party forms.
- Update JavaScript dependencies.
- Load Google reCaptcha script in footer (if needed).

## 4.5.1 – April 8, 2019

### Additions

- Add sign-up integration for [Give](#)
- Add sign-up integration for [UltimateMember](#)

### Improvements

- Write to debug log if Google reCAPTCHA secret key is incorrect.
- Validate reCAPTCHA keys when saving form settings.
- Allow setting an empty “successfully subscribed” message.

## 4.5.0 – March 27, 2019

### Additions

- Built-in integration with Google reCAPTCHA to prevent bots from subscribing to your Mailchimp lists.

### Improvements

- Minor improvements to the JavaScript that is loaded on admin pages.

## 4.4.0 – March 1, 2019

### Fixes

- AffiliateWP integration subscribing the wrong user if affiliate ID differs from user ID.

### Improvements

- Renamed “MailChimp” to “Mailchimp” to match Mailchimp’s new branding.
- More accurate handling of timeouts for accounts with many MailChimp lists.
- UX improvements for integrations overview page.
- Validate MailChimp API key format when it’s entered.
- Improved compatibility with Klarna Checkout in the WooCommerce checkout integration.
- Bumped required PHP version to 5.3 (soft requirement for now).

### Additions

- Added Gutenberg block for easily adding a form to a post or page.
- Added subscriber tags setting to forms.

## 4.3.3 – December 31, 2018

### Fixes

- Update WPForms integration to properly detect if the WPForms plugin is activated.

### Improvements

- Write API request parameters to the debug log in case of connection timeouts.
- Update JavaScript dependencies.

## 4.3.2 – December 11, 2018

### Fixes

- Use of `readonly` function, which is only available in WordPress 4.9 or later.

## 4.3.1 – November 28, 2018

### Fixes

- Fatal error on PHP versions older than 5.5

## 4.3 – November 28, 2018

### Additions

- Added `MC4WP_API_KEY` PHP constant which can be used to set your Mailchimp API key.
- Add `mc4wp_mailchimp_list_limit` filter hook to modify the maximum number of Mailchimp lists to fetch. Defaults to 200.

### Improvements

- Apply `mc4wp_integration_gravity-forms_options` filter hook on Gravity Forms integration options so the checkbox can be prechecked and the checkbox label text modified.
- The `updated_subscriber` JS event is now fired forms not using AJAX as well (when applicable).

## 4.2.5 – Sep 11, 2018

### Improvements

- Only re-add subscriber to list if we want to re-trigger a double opt-in confirmation email.
- Change Gravity Forms field name to “Mailchimp for WordPress”
- Get rid of cached result of Mailchimp API connection.

## 4.2.4 – July 9, 2018

### Improvements

- Ensure type-safety on some global variables.
- Stop showing trashed forms immediately.
- Pre-check Mailchimp list when creating a new form if there is only 1 list.
- Send `null` for unknown values in usage tracking data (only when opted-in).

### Additions

- Add methods for accessing Mailchimp’s e-commerce promo code endpoints to API class.

## 4.2.3 – June 11, 2018

### Fixes

- Don’t wrap “agree to terms” input in hyperlink element.
- Allow [ENTER] key again after field helper overlay is closed.

### Improvements

- Fallback to meta-refresh if redirect fails because of “headers already sent” error.

## 4.2.2 – May 22, 2018

### Fixes

- Events Manager integration was not working with logged-in users.
- Form preview URL should respect admin HTTP(S) scheme.
- Removed use of PHP 5.4 function.

### Improvements

- Add “agree to terms” checkbox to field helper.

### Additions

- Add filter `mc4wp_http_request_args`.

## 4.2.1 – April 11, 2018

### Fixes

- Namespace usage warning when running PHP 5.2

### Improvements

- Remove obsolete `type` attribute from all `<script>` tags printed by the plugin.
- Improved tooltips on settings pages.
- Do not pre-check integration checkboxes by default.
- Add textual warnings to settings that may affect [GDPR compliance](#).
- Update translation files.

## 4.2 – March 5, 2018

### Additions

- Live form preview while editing form.

### Improvements

- Improved [conditional fields logic](#).
- Debug log now includes request & response data.
- [Form JavaScript events](#) are fired in an isolated thread now, to prevent errors in event callbacks from breaking form functionality.
- Don't send empty field values to Mailchimp when updating subscribers.

- Show interest grouping ID in list overview on settings page.

#### Fixes

- Ninja Forms export checkbox would always state “checked” when form contained a Mailchimp sign-up checkbox.

### 4.1.15 – February 7, 2018

#### Fixes

- Dropdown fields with special characters were not properly passed to Mailchimp.
- Interest groups with an all-numeric ID were not properly passed to Mailchimp.

#### Improvements

- Various minor code optimizations
- Do not redirect when showing “already subscribed” warning.
- Improved scroll to form handling after a form is submitted without AJAX.

### 4.1.14 – January 8, 2018

#### Fixes

- Validate method was incorrectly checking required array fields.

#### Improvements

- Wrap some missing strings in translate calls. Thanks [morlor](#).
- Make it clear that redirecting after successful form submissions will not show the “subscribed” message.

### 4.1.13 – December 28, 2017

#### Fixes

- Array to string conversion in default form messages.

#### Additions

- Allow marking Gravity Forms sign-up checkbox as a required field.

### 4.1.12 – December 11, 2017

### Fixes

- Ninja Forms double opt-in setting was incorrectly inverted.

### Improvements

- Simplified form processing & notice logic.
- Prevent 404 errors by proactively replacing lowercased `name="name"` input attributes.
- Updated JavaScript dependencies.

### Additions

- Integration for AffiliateWP.

## 4.1.11 – November 2, 2017

### Fixes

- Filter out empty array values when overriding selected Mailchimp lists via `_mc4wp_lists`.

### Improvements

- Updated JavaScript dependencies.

### Additions

- Link to the [HTML Forms](#) from the plugin settings pages.

## 4.1.10 – October 19, 2017

### Improvements

- Remove unused options from Ninja Forms integration.
- Now logging all sign-ups from Ninja Forms integrations when using [Mailchimp for WordPress Premium](#).

### Additions

- Added Gravity Forms integration. You can now integrate with Gravity Forms by adding the “Mailchimp” field to your forms.

## 4.1.9 – September 19, 2017

### Improvements

- Add `<label>` element to sign-up checkbox for WCAG compatibility.
- Custom integration now works with Enfold theme's contact form element.

## 4.1.7 & 4.1.8 – September 8, 2017

### Fixes

- Properly escape the return value of `add_query_arg` when it is used in HTML attributes to prevent cross-site scripting. Thanks to [Karim Ouerghemmi of RIPS](#) for responsibly disclosing.
- Now loading integrations after WPML so that String Translations work properly.

### Additions

- Add sign-up integration for WPForms forms.

### Improvements

- Updated internal JS dependencies.
- Form tag `{data key="foo.bar"}` now allows you to access nested array values.

## 4.1.6 – July 31, 2017

### Fixes

- Method on API class for retrieving campaign data.

### Improvements

- Show Akamai reference number when an API request is blocked by Mailchimp's firewall.
- Minor output buffering improvements in form previewer.

## 4.1.5 – June 27, 2017

### Fixes

- Failsafe against outputting sign-up checkbox twice in registration forms.
- Properly close HTML anchor element in French translation files.
- Fix BuddyPress sign-ups when using WordPress Multisite.

### Improvements

- Fire action hook `mc4wp_form_updated_subscriber` whenever a form was used to update a subscriber in Mailchimp.

- Increase browser timeout for AJAX request when fetching Mailchimp lists.

### **Additions**

- Added campaign & template methods to API client class.

## **4.1.4 – June 15, 2017**

### **Fixes**

- Some form specific JS events were not firing due to incorrect event names.
- Registration form integration now works with WooCommerce registration form.
- Notice that asks for a plugin review would re-appear after dismissing it.

## **4.1.3 – May 24, 2017**

### **Improvements**

- Randomise time of cron event that renews Mailchimp lists.
- Always try to show Mailchimp list info when API key is given.

## **4.1.2 – May 8, 2017**

### **Fixes**

- Use earlier hook priority for Ninja Forms 3 integration so action is registered on time.

### **Improvements**

- Improved Mailchimp list fetching & memory usage for accounts with many lists.
- Show error message when fetching lists fails.
- Updated plugin translations.

## **4.1.1 – April 11, 2017**

### **Fixes**

- WPML String Translation not working with the checkbox label for sign-up integrations.

### **Improvements**

- Use updated order methods when using WooCommerce 3.0, thanks to Liam McArthur.

- Updated JavaScript dependencies.

## 4.1.0 – March 14, 2017

### Improvements

- Updated all JavaScript dependencies in the plugin.
- Failsafed filter hooks to prevent invalid variable types.
- Explain that greyed out integrations means that specific plugin is not activated.
- Conditional form elements now uses event delegation, so it works with forms in [Boxzilla pop-ups](#).
- Updated language files.

### Additions

- Added support for Ninja Forms 3.
- Added `mc4wp_integration_show_checkbox` filter.

## 4.0.13 – February 8, 2017

### Improvements

- Ensure fields are HTML decoded before sending to Mailchimp.
- Better OptimizePress compatibility.
- Show all address-type fields as required when form contains 1 or more fields of the same address group.

## 4.0.12 – January 16, 2017

### Fixes

- Don't call `stripslashes` on POST data twice.

### Improvements

- Plugin review notice is now dismissible over AJAX.
- Improved formatting of birthday fields.
- Updated Polish translations, thanks to Mateusz Lomber.
- Updated German translations, thanks to Sven de Vries.

### Additions

- Add `update_ecommerce_store_product` method to API class.

- Throw form specific JavaScript events, like `15.subscribed` to hook into “subscribed” events for form with ID 15.

## 4.0.11 – December 9, 2016

### Fixes

- Unescaped request variable on integration settings page, allowing for authenticated XSS. Thanks to [dxwsecurity](#) for responsibly disclosing.

### Improvements

- Add `$args` parameter to `API::get_lists_activity` method. Relates to the [Mailchimp Activity](#) plugin.

## 4.0.10 – December 6, 2016

### Improvements

- You can now enable or disable debug logging from the “Other” settings page.
- No longer using deprecated function in Contact Form 7, thanks to [stodorovic](#).
- Improved UI for adding hidden interest groupings fields to a form.

## 4.0.9 – November 23, 2016

### Fixes

- Issue with escaped HTML when using form tags introduced by previous update.

## 4.0.8 – November 23, 2016

### Improvements

- Improved handling of large debug logs.
- Improved error messages when writing exceptions to debug log.
- Show notice when form is missing ...
