ActFax Product Overview

ActFax - The Fax Server Software for Windows and Unix

As a leading product for company-wide integration of network fax solutions, ActFax sets standards for years. Fax messages are sent from any workstation and any application in a matter of seconds.

Many major companies from different business lines all over the world are our [customers](#) and trust in ActFax. The client/server architecture of ActFax stands for a fast and simple integration of fax and email with Windows as well as other operating systems, like Unix (i.e. AIX, HP-UX,

Solaris), Linux or mainframes. The software also offers full support for terminal server and Citrix (XenApp) environments. The connection to the public switched telephone

network can be done through analog lines, ISDN, [VoIP/FoIP, SIP and T.38](#), as well as [Web Fax Providers \(Cloud Fax\)](#).

- Fax transmissions from **any workstation and any application**
- **Easy integration** into own applications
- Supports **Terminal Services and Citrix**
- Runs on **Virtual Machines and VMWare**
- **Secure Email connections** through SSL/TLS encryption

The easy integration of ActFax into own applications is used for fully automated fax transmissions. With the built-in fax client software or through email notifications you always keep track of the status of your fax messages.

High scalability for small, medium-sized and large installations

The high scalability of ActFax allows efficient usage of the faxsoftware for small installations with just a few workstations and a single fax line, as well as large

installations with thousands of users and more than 60 simultaneous fax lines. Direct connectivity of the fax server with Active Directory guarantees minimum administrative effort. The overall capacity of your

system can be adapted to your needs at any time by simply adding extra fax lines to the fax server. The maximum number of lines is not limited by the ActFax license.

Seamless integration into own applications

In addition of sending and receiving fax messages from any standard application, ActFax can also be used for easy integration into own applications, for example to fax fully

automated purchase orders or order confirmations. A large number of interfaces and the support of all major printer emulations ensure seamless integration into Windows or Web-based applications, as well as applications running on different operating systems. Automatic faxing from individual applications has never been that easy.

✔ Supports Windows 11

✔ Supports Windows 2025

✔ Supports Exchange 2019

✔ Supports Office 365

More information about all functions and features of ActFax can be found in the [product details](#) section. ActFax is also available for free download through the [download area](#) on our website for in-depth testing before buying, to make sure the software meets all your requirements.
