How It Works

Starting your online travel business is simple with adivaha®. We help you move from idea to launch with the right technology, tools, and support.

Choose Your Business Model

Decide how you want to run your travel business. You can sell directly to customers, work with travel agents, or launch a white-label travel brand.

Test the Setup in Staging

We help you test your travel platform in a staging environment so you can review the design, booking flow, and overall user experience before launch.

Go Live

Once your website is tested and approved, we help you launch it on the live server so it is ready for real customers and bookings.

Start Selling

Once your platform is ready, you can begin taking bookings, serving customers, and growing your travel business online.

What You Can Sell

Build a complete travel business by offering multiple travel services through one powerful platform.

01.

Flights

Offer domestic and international flight bookings with real-time fares and availability.

02.

Hotels

Sell hotel bookings with room details, pricing, and global inventory access.

03.

Transfers

Provide airport transfers, city transport, and private ride booking services.

04.

Tours & Activities

Offer sightseeing tours, experiences, local activities, and attraction tickets.

05.

Holiday Packages

Travel Technology Use Cases

From B2C portals to enterprise-grade travel ecosystems, our platform supports every distribution and booking model.

B2C

Sell directly to customers through your own travel website.

B2B

Sell to travel agents, partners, or sub-agents through a dedicated agent system.

Enterprise

for Corporates/DMCs/Ground and Air Allotments all customized to your niche market

Extranet Services

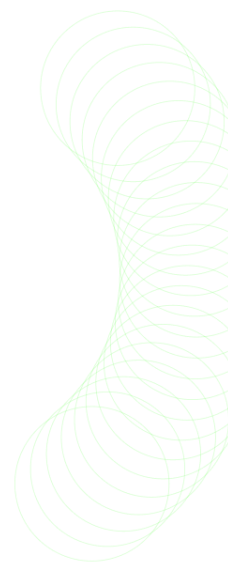

Travel XML & APIs

Connect with GDS, NDC, LCC, bedbanks, channel managers, and direct supplier APIs to build scalable booking and distribution ecosystems.

Gift Cards & Loyalty Points

Improve customer retention and repeat bookings with gift cards, reward programs, loyalty points, and promotional credit systems.

Why Start This Business

Starting an online travel business can open the door to long-term growth, flexible operations, and multiple earning opportunities.

Earn Commission on Bookings

Generate revenue through commissions, markups, and service margins on each booking.

Start with less investment compared to building a travel technology platform from scratch.

Work From Anywhere

Run your business online from anywhere with the right system and support.

Global Customers

Reach customers across cities, countries, and international markets.

Time to Launch

Easy Setup

adivaha® simplifies the setup process so you can focus on growing your business instead of dealing with technical complexity.

01.

Launch in Days

Go live quickly with a ready-made travel business solution.

02.

No Technical Skills Needed

You do not need advanced technical knowledge to get started.

03.

Full Support

Clients Testimonials

Discover how our valued clients describe their experiences with us—real stories of trust, satisfaction, and lasting partnerships built together.

"I have just started using adivaha plugin on my website on my website I can't tell you how amazing it is and the support team is so helpful , really quick on replying. I would recommend highly to use it."

jeandie ilonga

"We recently integrated Adivah's API into our system at Tripzen Ltd., and the experience has been nothing short of exceptional. The API's documentation was thorough and well-organized, making the integration process seamless and straightforward for our development team."

Tripzen ltd

"I would like to thank especially Satyam and Mukesh for their support. They helped me solve my issue, they responded quickly and were very polite. I advise anyone to contact these two guys at this company and they will provide you with great service."

Ahmad Samo
