

Bome Software is a manufacturer of software and hardware for music production on stage and studio. Our main focus is on MIDI control and MIDI networking, catering to customers like musicians, performers, lighting engineers, electronic DJ's and many more.

Each of our products is designed to be as powerful as it is intuitive. With applications including MIDI Translator Pro, Bome Network, Send SX, and our signature hardware, the BomeBox, we aim to provide our users with a range of MIDI tools that will make your next project easier while freeing up your creative side.

As a small and flexible team, we are proud to provide superior product quality, personalized customer service, and specialized development targeted to your needs.

BomeBox 2: Coming Soon*

We listened to you and improved the BomeBox — while keeping everything you love about the original. We're excited to introduce the new and enhanced BomeBox 2.

What's New?

- 2x MIDI IN & OUT (instead of 1x)
- 2x USB Host (instead of 1x)
- USB-C for power
- USER button with RGB LED that can be assigned various functions, or act as a one-button MIDI controller
- Doubled memory: more space for Bome MIDI Translator Pro projects and processing scripts
- Faster processor: more headroom for feature additions via firmware updates

What We Kept

- Same small size: robust, and lightweight
- 2x Ethernet ports: easy to use MIDI networking
- Wireless LAN
- Power over Ethernet (as alternative to USB-C)
- Rock-solid reliability

***We estimate availability in summer 2026.**

Bome MIDI Translator Pro Turns 20

Since its first release in 2006, Bome MIDI Translator Pro has evolved continuously — we've added many powerful features, adapted it to current operating systems, and kept it rock-solid for live and professional use.

We're committed to keep working on it for many years to come. In order to be able to support the ongoing development, we're adjusting the price, for the first time ever, to EUR 79.00.

If you've been planning to purchase Bome MIDI Translator Pro, you can still secure it at the current price **until February 28, 2026**:
