

Change logs

Before update, make sure to perform a full site and database backup, so that it may be used to retrieve the working version if anything unexpected happens.

Important: If your add-ons stopped working after Bookly update, please make sure you're using the latest version of all Bookly items installed on your configuration (including Bookly Pro and other add-ons). In Plugins, click 'Check for updates' to download the most recent version.

Bookly

Bookly
