

(<https://www.couchcms.com/>)

What makes Couch perfect for web designers?

Here are a few of the many reasons

NO KNOWLEDGE OF PHP EXPECTED!

Take any HTML design you have created, add some familiar XHTML like Couch tags into it and make it CMS managed within minutes.

YOUR MARKUP REMAINS UNTOUCHED

Couch does not add a single byte of its own markup into your design. The CMSified site remains 100% fidel to your original static design.

CLIENTS LOVE THE SIMPLE ADMIN PANEL

Couch gives you an absolutely blank admin-panel to begin with. Add to it only the elements that are editable by the clients.

SIMPLE BUT NOT FOR ONLY SIMPLE SITES!

Use Couch's powerful features like **relations**, **saving form submissions into database**, **custom routes** etc. to create sites that would otherwise require you to be a PHP Ninja!

TIME-TESTED AND SECURE

Couch has been around for nearly six years now and is used by thousands of sites world-wide. You can trust it to keep your site safe from web hacks like XSS, CSRF etc.

OPEN SOURCE AND FREE!

You get all this for free! Compare it to similar commercial solutions that will cost you anything from \$100 to \$300. In case you happen to need it, support is only a call away.
