 [Scanner](#) [Download Site1](#) [Download Site2](#) [Download Site3](#)

Free IP  scanner is a very fast IP scanner and port scanner. It is intended for both system administrators and general users to monitor and manage their networks. Powered with multi-thread scan technology, this program can scan hundreds computers per second. It simply pings each IP address to check if it's alive, then optionally it is resolving its hostname, scans ports, etc.

Free IP scanner can also display NetBIOS information: host name, workgroup, currently logged user and MAC address. The information obtained can be exported into a file as plain text file.

Try this program and you will see, how easy and simple your network management can be.

Key Features

- Fast and stable multi-threaded IP scanning
Free IP Scanner can scan hundreds of computers per second which is ideal for administrators. You can configure it to scan in many priority levels, set number of maximum threads and so on.
- Fully configurable Port Scan
- Save obtained information into text file
- A simple, user-friendly interface makes operation easy for users
- 100% Spyware FREE, NOT contain any Spyware, Adware or Viruses

Notes: Free IP Scanner is provided as standalone executable, so it doesn't require any installation process or additional DLLs. Just copy the executable (ipscan.exe) to any folder you like, and run it.

If you like the version include Install and Uninstall, you can download  [here](#).

Quick Start Guide

- Step 1: Run the program
Follow Start > All Programs > Free IP Scanner > Free IP Scanner.
Or just double click the Free IP Scanner icon  on your Desktop.
- Step 2: Select ip scan range and start scanning
Use two fields of IP Range to enter first and last IP addresses. The last IP address can be less than the first one - there is no problem with translating your input. To begin the scan, press the 'Start Scanning' button.

When the program is scanning, this button becomes the 'Stop Scanning' button. Below at the picture there is the main program interface.

Support Free IP Scanner

Free IP Scanner is a freeware product, this means that you can download and use it for free. Anyway we will appreciate contributions: we will use collected money to finance new development of Free IP Scanner.

Without your support, perhaps we can't keep adding new features. Thanks for your help.

Any donations large or small are greatly appreciated :)

Our other products: [Taskbar Hide](#) - Hide windows program software.

[Free Internet Window Washer](#) - A free window washer and internet eraser.
