Vulnerability Details

A persistent (stored) XSS vulnerability was discovered in Carbon Forum version 5.9.0. The vulnerability allows an attacker to inject malicious JavaScript code into the Forum Name field under the admin settings. This payload is stored on the server and executed in the browser of any user who visits the forum, leading to potential session hijacking, data theft, and other malicious activities.

Steps to Reproduce

1. Login as Admin: Access the Carbon Forum with admin privileges.
2. Navigate to Settings: Go to the '/dashboard' and select the Basic section.
