Better email delivery starts here

WordPress's default mail setup often isn't enough for consistent email delivery. [Gravity SMTP](#) improves how your site sends messages, helping more emails reach inboxes instead of getting flagged as spam.

With a focus on visibility and control, Gravity SMTP offers an [easy setup](#) process, a built-in migration tool, support for [trusted email services](#), and clear reporting so you can track delivery with confidence.

Key features that keep your emails flowing:

- **Automatic backup connection** – Create a secondary email route that activates instantly if your primary connection fails, ensuring uninterrupted delivery.
- **Comprehensive email logging** – Track every outgoing message with detailed logs, including delivery status, open rates, timestamps, and recipient information.
- **Insightful reports dashboard** – Review email performance at a glance, with data on total sends, open rates, top sources, and delivery trends.
- **Real-time failure alerts** – Get notified immediately when delivery issues occur through Webhook alerts or SMS (via Twilio integration).

For advanced setups, Gravity SMTP also supports [custom integrations](#) with email services outside the standard Setup Wizard options, giving you flexibility no matter your workflow.

Get Gravity SMTP today!

Gravity SMTP delivers reliable, professional-grade email sending for WordPress websites.
