## Drive Power Manager

Drive Power Manager is a utility to change the power management and performance settings of hard disks and CD/DVD/BD drives. It offers detailed settings to save power, reduce noise or increase performance. Drives can be put in standby immediately by simply pressing a button. The power management settings are sent directly to the drive and are independent of the operating systems settings.

Program	Version	Date	Filename	Filesize
Drive Power Manager	1.10	12 January 2010	<a href="#">DrivePowerManager_setup_110.exe</a>	482 KB

Supported operating systems: Windows 2000, Windows XP, Windows Vista, Windows 7.

Hardware requirements: hard disk (internal or external) or CD/DVD/BD drive.  
Note: due to hardware limitations some drives may not support all functions.

Licensing information: after installation you can try out the program for 21 days. If you want to use the program after this period you have to purchase a serial number. The price for a single user license is **\$14.95 USD** or **12.95 EUR**. For more information please visit the drive Power Manager website at <http://www.drivepowermanager.com>.
