About

Last time Johnny from IT tried i-doit Pro, you won't believe what happened to him...
This website uses cookies

This website uses cookies. By clicking on "Accept" you agree to the processing and anonymous transfer of your data also to third parties. The data collected in this way helps us to understand how you interact with our website. This enables us to constantly improve your user experience and the quality of the content. You can refuse the use of cookies or adjust your preferences.

The screenshot displays the i-doit Pro web interface. At the top, there is a navigation menu with categories like Contact, Information, Software, Hardware, Network, DNS, Infrastructure, CMDB Explorer, Extras, and Add-ons. A search bar and user profile (admin @ ACME IT Solutions) are also visible. The main content area shows a hierarchical network diagram with a central 'Server' node (cache01) connected to various other nodes including 'Operating system', 'Person groups', 'System service', 'Cluster', 'Layer 3-Net', 'Rack', and 'Persons'. A sidebar on the left contains several sections: 'Object information', 'Necessary', 'Preferences', 'Functions', 'Statistics', and 'Marketing', each with a list of items and checkboxes. A status bar at the bottom indicates a recent object creation event.

Open vs Pro?

- Complex user rights management
- Effortless data imports with the built-in CSV-import
- Custom fields and data models
- Reporting tool
- Bulk asset management

- Get connected to your network ecosystem with API, powerful add-ons and integrations
