About

The IT documentation solution **i-doit Open** is built on a robust open-source configuration management database (CMDB).

This website uses cookies

i-doit Open is simple to install and you can create a customized CMDB data model for your needs.

This website uses cookies. By clicking on "Accept" you agree to the processing and anonymous transfer of your data also to third parties. The screenshot shows the i-doit CMDB Server interface. The main table lists server assets with the following columns: Primary hostaddress, Location path, Purpose, and CMDB status. The CMDB status column includes icons for 'in operation' (green), 'planned' (orange), and 'not in operation' (red).

Overlaid on the screenshot is a cookie consent banner with the following text:

This website uses cookies

This website uses cookies. By clicking on " Accept" you agree to the processing and anonymous transfer of your data also to third parties. The data collected in this way helps us to understand how you interact with our website. This enables us to constantly improve your user experience and the quality of the content. You can refuse the use of cookies or adjust your preferences.

Three callout boxes are present on the screenshot:

- Consent**: Points to the cookie consent banner.
- Details**: Points to the 'Server' tab in the breadcrumb navigation.
- About**: Points to the 'CMDB status' column header.

A URL is overlaid on the screenshot: https://www.cookiebot.com/en/what-is-behind-powered-by-cookiebot/?utm_source=banner_cb&utm_medium=referral&utm_content=v2

About

Last time Johnny from IT tried i-doit Pro, you won't believe what happened to him...
This website uses cookies

This website uses cookies. By clicking on "Accept" you agree to the processing and anonymous transfer of your data also to third parties. The data collected in this way helps us to understand how you interact with our website. This enables us to constantly improve your user experience and the quality of the content. You can refuse the use of cookies or adjust your preferences.

The screenshot displays the i-doit Pro web interface. At the top, there is a navigation menu with categories like Contact, Information, Software, Hardware, Network, DNS, Infrastructure, CMDB-Explorer, Extras, and Add-ons. A search bar and user profile (admin @ ACME IT Solutions) are also visible. The main content area shows a hierarchical network diagram with a central 'Server' node (cache01) connected to various other nodes including 'Operating system', 'Person groups', 'System service', 'Cluster', 'Layer 3-Net', 'Rack', and 'Persons'. A sidebar on the left contains several sections: 'Object information', 'Necessary', 'Preferences', 'Functions', 'Statistics', and 'Marketing', each with a list of items and checkboxes. A status bar at the bottom indicates a recent object creation event.

Open vs Pro?

- Complex user rights management
- Effortless data imports with the built-in CSV-import
- Custom fields and data models
- Reporting tool
- Bulk asset management

- Get connected to your network ecosystem with API, powerful add-ons and integrations
