Reflected Cross-Site Scripting (XSS) on Anon Proxy Server

Posted date 01/12/2025

Identificador: INCIBE-2026-247

Importance 3 - Medium

Affected Resources

Anon Proxy Server v0.104.

Description

INCIBE has coordinated the disclosure of three medium-severity vulnerabilities affecting Anon Proxy Server, a fast proxy server with HTTP, HTTPS, and SOCKS caching. The vulnerabilities were discovered by Rafael Pedrero.

These vulnerabilities have been assigned the following codes, CVSS v4.0 base score, CVSS vectors, and CWE vulnerability type:

We use a selection of our own and third-party cookies on the pages of this website: Essential cookies, which are required in order to use the website; functional cookies, which provide better easy of use when using the website; performance cookies, which we use to generate aggregated data on website use and statistics; and marketing cookies, which are used to display relevant content and advertising. If you choose "ACCEPT ALL", you consent to the use of all cookies. You can accept and reject individual cookie types and revoke your consent for the future at any time at "Settings".
