XSS Vulnerability in WooCommerce Product Vendors Plugin

📅 September 1, 2017

On August 31, 2017, it was discovered that WooCommerce fixed a cross site scripting vulnerability in its popular ‘Product Vendors’ plugin—a premium WordPress plugin for WooCommerce used on 28% of all WooCommerce stores.

Update to 2.0.36 Immediately

The latest version of the ‘Product Vendors’ plugin is 2.0.40, but if you are using an older version 2.0.35 it is recommended you immediately update to 2.0.36. You
