Subject: [OSSA-2026-006] OpenStack Skyline: DOM-based XSS in Skyline Console via unsanitized instance console log rendering (CVE-2026-pending)

=====
OSSA-2026-006: DOM-based XSS in Skyline Console via unsanitized instance console log rendering
=====

:Date: April 09, 2026

:CVE: CVE-2026-pending

Affects

- Skyline-console: <5.0.1, ==6.0.0, ==7.0.0

Description

Myunghyun Lee (Team Open the Window, Stealien SSL 6th) reported a DOM-based Cross-Site Scripting (XSS) vulnerability in Skyline Console. The instance console log viewer rendered log content in a new browser window using document.write() without sanitizing or escaping the output. Deployments where administrators use the Skyline Console web interface to view instance console logs are affected.

Patches

- <https://review.opendev.org/982356> (2024.2/dalmatian)
- <https://review.opendev.org/982355> (2025.1/epoxy)
- <https://review.opendev.org/982350> (2025.2/flamingo)
- <https://review.opendev.org/973351> (2026.1/gazpacho)

Credits

- Myunghyun Lee from Team Open the Window, Stealien SSL 6th (CVE-2026-pending)

References

- <https://launchpad.net/bugs/2138575>
- <http://cve.mitre.org/cgi-bin/cvename.cgi?name=CVE-2026-pending>

Notes

- Until upgraded, operators should restrict or avoid use of "View Full Log" for instances where console output may be influenced by untrusted users.
- A CVE request was filed with MITRE on 2026-03-25.
- The fix was merged on the master branch before the stable/2026.1 branch was cut, so no specific stable/2026.1 patch exists. The fix is included in the gazpacho (8.0.0) release.
