Looking for a replacement for ProShow?

If you're looking for a great replacement solution for creating slideshows on your desktop, our official recommendation is [Photopia](#). Learn more below!

Photodex recommends Photopia!

If you're looking for a great replacement solution for creating slideshows on your desktop, our official recommendation is [Photopia](#). Photopia offers the next generation of slideshow software. Built from the ground up, but using Photodex's knowledge and experience, Photopia has created a new product that will be instantly familiar to ProShow users while also taking a major leap forward.

[Photopia](#) was designed to support existing ProShow content. Slideshows, Slide Styles, Transitions, and Templates from ProShow can be imported directly into Photopia Director and Creator.

[Photopia](#) is available now for Windows and they aim to launch a native Mac version at the end of the first quarter of 2020.

Try out [Photopia](#) today, or watch a [Demo Video](#) created with Photopia Director.
