

Assessing Third Party Risk?

[See how we can help ↗](#)

for the entire AI Governance Committee: TPRM, InfoSec, Privacy, Legal and beyond

Protecting over \$2 Trillion in market cap for customers from the Fortune 50 to the Am Law 50

“Using PromptArmor, we’ve been able to massively cut down the time it takes to evaluate AI and show value to the business faster.

PromptArmor will be invaluable and a game changer as we continue to see new Generative AI capabilities.”

Claude for Excel Gets Tricked Into Leaking Secrets

“... After The Information approached Anthropic for comment on the PromptArmor report, the company said in a statement that it was updating the popup window in Claude for Excel to feature a new warning message in red explaining potentially suspicious activity when Claude is trying to send data externally . . .”

Understand how an application uses an LLM:

What data it sends to the model

What permissions the LLM application has

What third-party data sources and applications are involved
