runZero Platform dashboard configuration exposure

[todob](#)

| Updated May 5, 2026, 8:00am EDT

Vendors: [runZero](#)

Products: [Platform](#)

Related: [CVE-2026-7778](#)

Executive summary

An issue that could allow a dashboard configuration to be viewed from outside of the authorized organization scope has been resolved. This is an instance of [CWE-269](#): Improper Privilege Management, and has an estimated CVSS score of CVSS:3.1/AV:N/AC:L/PR:L/UI:N/S:C/C:L/I:N/A:N (5.0, Medium). This issue was fixed in version v4.0.260416.0 of the runZero Platform.

Attacker value

By inspecting another organization's dashboard, an attacker (who is also an authorized runZero user) could learn about what that organization is most concerned about with their exposure and asset management strategies, thus helping the attacker devise more specifically targeted attacks.

Tod Beardsley is VP of Security Research at [runZero](#), where he "kicks assets and fakes frames." Prior to 2025, he was the Section Chief for the Vulnerability Response section for CSD/VM/VRC at [CISA](#), the Cybersecurity and Infrastructure Security Agency, part of the US government, and a seasonal Travis County Election Judge in Texas. He's also a founder and CNA point of contact for [AHA!](#). Tod spends much of his time involved in vulnerability research and coordinated vulnerability disclosure (CVD). He has over 30 years of hands-on security experience, stretching from in-band telephony switching to modern ICS/OT implementations. He has held IT ops, security, software engineering, and management positions in large organizations such as the US Government, Rapid7, 3Com, Dell, and Westinghouse, as both an offensive and defensive practitioner. Tod is a [CVE Board member](#), has authored several [research papers](#), and is an internationally-tolerated [horror fiction expert](#).
