2013-07-01

I am pleased to announce the Shrew Soft VPN Client 2.2.2 Release is now available for download. This release includes improved documentation as well as support for automatically reconnecting to a remote gateway. For a complete list of changes, please review the changelog and product documentation available on our website.

2013-06-06

I am pleased to announce that our online store is now open for business. Feel free to evaluate our the Professional version of our VPN Client during the trial period. If you like the product, you can purchase licenses to use the Professional Edition from our online store, the Shrew Soft Shop. If you don't need the additional features offered by the Professional version, the Standard version is still available, free of charge for both personal and commercial use.

2013-06-05

I am pleased to announce the Shrew Soft VPN Client 2.2.1 Release is now available for download. This is the first release that will offer both standard and professional editions. Professional edition licenses will be available for purchase from our online store in the near future. In addition, this release fixes several important bugs on multiple platforms. For a complete list of changes, please review the changelog and product documentation available on our website.

2013-04-24

I am pleased to announce the Shrew Soft VPN Client 2.2.0 Release is now available for download. This is a major release that includes numerous bug fixes and greatly improved platform support. Linux and BSD builds now utilize modern Qt4 interfaces instead of the outdated Qt3 interfaces. Windows builds now support Windows 8. Preliminary support for OSX has also been added. For a complete list of changes, please review the changelog and product documentation available on our website.
