## Overview

**Comment:** Raise an error right away if the number of aggregate terms in a query exceeds the maximum number of columns.

**Downloads:** See separate download page

**Timelines:** family | ancestors | descendants | both |  trunk

**Files:** files | file ages | folders

**SHA3-256:**  5508b56fd24016c13981ec280ecdd833007c9d8dd595edb295b984c2b487b5c8

**User & Date:** drh  2025-06-27 19:02:21.291

## References

2025-08-05

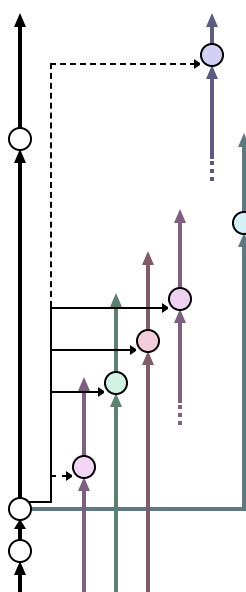

21:04 ○ Fix the same potential integer overflow problem of [5508b56fd24016c1] in a different and much simpler way. No error is raised but memory errors are avoided. (check-in: **6f4a6e564b** ... )

2025-08-01

13:01 ● Fix the same potential integer overflow problem of [5508b56fd24016c1] in a different and much simpler way. No error is raised but memory errors are avoided. (leaf check-in: **ff6b0ddf04** ... )

## Context

2025-07-23

23:12  Raise an error right away if the number of aggregate terms in a query exceeds the maximum number of columns. (check-in: **733652d00a** ... )

2025-06-29

07:32 Minor API doc typo fixes from brickviking. (check-in: **c7cf9dcb69** ... )

2025-06-28

17:59 Improve the bytecode generated for comparisons so that if one operand is a subquery and the other operand evaluates to NULL, the subquery operand is not even computed. This fixes 5 of the 11 slow queries described in [forum post 52651713ac](#). (check-in: **f147bc0477** ... )

14:36 Merge all the latest trunk fixes and enhancements into the reuse-schema branch. (check-in: **6e1f97d99b** ... )

14:24 Merge the latest trunk enhancements into the wal2 branch. (check-in: **e7867c3992** ... )

14:16 Merge the latest trunk enhancements into the begin-concurrent branch. (check-in: **1ae8d60237** ... )

2025-06-27

19:56 Raise an error right away if the number of aggregate terms in a query exceeds the maximum number of columns. (check-in: **4ae45291e6** ... )

19:02

Raise an error right away if the number of aggregate terms in a query exceeds the maximum number of columns. (check-in: **5508b56fd2** ... )

12:46

API doc typo fixes and closing DD element tags from brickviking. (check-in: **c9ddd15b01** ... )

## ☐ Changes

Unified Diff Side-by-Side Diff Patch

Changes to src/expr.c.

Changes to src/sqliteInt.h.
