[R1] Nessus Agent Versions 8.3.3 and 10.1.3 Fix One Third-Party Vulnerability

High

[← View more security advisories](#)

Synopsis

Nessus Agent leverages third-party software to help provide underlying functionality. One of the third-party components (OpenSSL) was found to contain vulnerabilities, and an updated version has been made available by the provider.

Out of caution and in line with best practice, Tenable has opted to upgrade OpenSSL to address the potential impact of the issue. Nessus Agent 8.3.3 and Nessus Agent 10.1.3 update OpenSSL to version 1.1.1n to address the identified vulnerability.

Solution

Tenable has released Nessus Agent 8.3.3 and Nessus Agent 10.1.3 to address these issues. The installation files can be obtained from the Tenable Downloads Portal (<https://www.tenable.com/downloads/nessus-agent>).
