## Firmware

A firmware update can resolve issues that the previous firmware version may have and improve its current performance.

## To Upgrade

**IMPORTANT:** To prevent upgrade failures, please read the following before proceeding with the upgrade process

- **Please upgrade firmware from the local TP-Link official website of the purchase location for your TP-Link device, otherwise it will be against the warranty. Please click [here](#) to change site if necessary.**
- Please verify the hardware version of your device for the firmware version. Wrong firmware upgrade may damage your device and void the warranty.  
How to Find the Hardware Version on Your TP-Link Device
- **Do NOT turn off the power during the upgrade process, as it may cause permanent damage to the product.**

## To Use Third Party Firmware In TP-Link Products

Some official firmware of TP-Link products can be replaced by the third party firmware such as DD-WRT. TP-Link is not obligated to provide any maintenance or support for it, and does not guarantee

the performance and stability of third party firmware. Damage to the product as a result of using third party firmware will void the product's warranty.

## Open Source Code For Programmers (GPL)

The following information is for programmers, and is unnecessary for most TP-Link home users.

The products of TP-Link partly contain software code developed by third parties, including software code subject to the GNU General Public Licence ("GPL"), Version 1/Version 2/Version 3 or GNU Lesser General Public License("LGPL"). You may use the respective software condition to following the GPL licence terms.

You can review, print and download the respective GPL licence termshere. You receive the GPL source codes of the respective software used in TP-Link products for direct download and further information, including a list of TP-Link software that contain GPL software code under GPL Code Center.

The respective programs are distributed WITHOUT ANY WARRANTY; without even the implied warranty of merchantability or fitness for a particular purpose. See the GNU General Public License for more details.
