Firmware

A firmware update can resolve issues that the previous firmware version may have and improve its current performance.

To Upgrade

Welcome to Our Website! If you stay on our site, we and our third-party partners use cookies, pixels, and other tracking technologies to better understand how you use our services, and improve our services, and personalize your experience and ads based on your interests. Learn more in [your privacy choices](#).

Okay

change site if necessary.

- Please verify the hardware version of your device for the firmware version. Wrong firmware upgrade may damage your device and void the warranty.
How to Find the Hardware Version on Your TP-Link Device
- **Do NOT turn off the power during the upgrade process, as it may cause permanent damage to the product.**
